Plugin Subscribe Group

Introduced with Tiki 2

If you have allowed users to subscribe themselves to (join) a group, you can use this wiki plugin to allow them to subscribe/unsubscribe to a specific group. Please see PluginSubscribeGroups for a similar plugin for subscribing/unsubscribing to more than one group.

Security and permissions

- A user must have the perm [tiki_p_subscribe_group] to be able to see the box
  To set this permission go to Settings > Groups
- The group must be set as being a user choice
  To set this configuration go to Settings > Groups

Parameters

Introduced in Tiki 2. Required parameters are in **bold**.

Go to the source code

Preferences required: wikiplugin_subscribegroup

<table>
<thead>
<tr>
<th>Parameters</th>
<th>Accepted Values</th>
<th>Description</th>
<th>Default</th>
<th>Since</th>
</tr>
</thead>
<tbody>
<tr>
<td>(body of plugin)</td>
<td></td>
<td>text displayed before the button</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>group</strong></td>
<td>groupname</td>
<td>Group name to subscribe to or unsubscribe from</td>
<td></td>
<td>2.0</td>
</tr>
<tr>
<td><strong>defgroup</strong></td>
<td></td>
<td>Make this the default group text, containing %s as the placeholder for the group name.</td>
<td>OK</td>
<td>9.1</td>
</tr>
<tr>
<td><strong>defgroup_action</strong></td>
<td></td>
<td>Default group button label. Will subscribe to the group first if not already a member.</td>
<td>OK</td>
<td>9.1</td>
</tr>
<tr>
<td><strong>undefgroup</strong></td>
<td></td>
<td>Stop this being default group text, containing %s as the placeholder for the group name.</td>
<td>OK</td>
<td>9.1</td>
</tr>
<tr>
<td><strong>undefgroup_action</strong></td>
<td></td>
<td>Stop this being default group button label. Does not unsubscribe from the group.</td>
<td>OK</td>
<td>9.1</td>
</tr>
<tr>
<td><strong>subscribe_action</strong></td>
<td></td>
<td>Subscribe button label, containing %s as the placeholder for the group name.</td>
<td>OK</td>
<td>2.0</td>
</tr>
</tbody>
</table>
Usage notes

- If you use this plugin with the plugin GROUP, be careful that if GROUP is used first, the change will not immediately be shown. GROUP used after SUBSCRIBEGROUP will be fine.
- A module with a filter on the group will be affected as soon as the group is changed.

Examples

Basic

This code:

```plaintext
{subscribegroup group="Editors" subscribe="Subscribe to %s" unsubscribe="Leave %s"
 subscribe_action="Name of subscribe submit button" unsubscribe_action="Name of unsubscribe submit button"}
```

Would produce:

```
Subscribe to Editors
OK
```
Advanced

It is possible to make a link to toggle from subscribed/unsubscribed status to some group called **GroupName** by creating a link to a page which contains this plugin and adding the following parameters:

```
group="GroupName&iSubscribeGroup=1&subscribeGroup=text"
```

Example:

```
http://www.example.com/somepage?group=GroupName&iSubscribeGroup=1&subscribeGroup=text
```

Of course, this works if the user is logged in, and **GroupName** needs the correct spelling and capitalization.
