Example

This code:

```plaintext
{TABS(name="user_tabset_01" tabs="Title 1|Title 2|Title3")}This is the content of the first tab
/////This is the content of the second tab
/////This is the content of the third tab
{TABS}
```

Would produce:

This is the content of the first tab
This is the content of the second tab

This is the content of the third tab

When clicking on a tab name, the content of each tab is loaded and shown without refreshing the browser window.

And when clicking on the "No Tabs" option, the display would change into:
