

# Plugin Versions

Use this [Wiki Plugin](#) to divide a [wiki](#) page into separate "versions." Tiki will display a navigation box that allows users to display each version of the page. For example, you can use this plugin to separate a single wiki page into Release 1, Release 2, and Release 3 information.

## Parameters

Create tabs for showing alternate versions of content

*Introduced in Tiki 1.*

[Go to the source code](#)

*Preferences required:* `wikiplugin_versions`

Parameters	Accepted Values	Description	Default	Since
(body of plugin)		Block of text separated by <code>-(version x)-</code> markers. Text before the first marker is used by default.		
<code>default</code>		Specifies version label to show when displaying the page for the first time. Default label is 'Default'	Default	1
<code>nav</code>	(blank) y n	Display a navigation box that allows users to select a specific version to display.	n	1
<code>title</code>	(blank) y n	Display the current version name as the title. No title shows when <code>nav="y"</code> ; otherwise shows by default.	y	1

## Notes

- If you use [Wiki Config](#) wiki page caching, this plugin may not render properly.
- The "versions" used for this plugin are different than the "versions" stored in the [wiki page history](#).

## Examples

To separate different versions of text use: 3 dashes (hyphens), followed by the version label in parenthesis, followed by at least 3 other dashes or hyphens. For example:

---(version 3)-----

### Basic example

*This code:*

```
{VERSIONS(nav="y" title="y")}
```

This is the default text

---(version 3)-----

This is version 3 info

---(version 2)-----

This is version 2 info

---(version 1)-----

This is version 1 info

{VERSIONS}

Would produce:

This is the default text

## More Examples

This code:

```
{VERSIONS(nav="n")} This is the default text ---(version 3)----- This is version 3 info ---(version 2)-----  
----- This is version 2 info ---(version 1)----- This is version 1 info {VERSIONS}
```

Would produce:

### Default

This is the default text

Sample usage in conjunction with [PluginTracker](#) and [PluginTrackerList](#) (these are Screenshots):

The screenshot shows the top part of a website titled 'Inscripcions 2007'. Below the title is a navigation bar with 'Pre-inscripcions als cursos de l'any 2007' and a language dropdown set to 'Català'. A yellow box highlights the word 'Formulari' in the main content area, with a link 'Mostra les pre-inscripcions ja realitzades...' below it. The main content area is titled 'Cursos i horaris disponibles - 2007' and lists two courses with checkboxes.

Default text: Formulari, using PluginTracker

The screenshot shows the same website but with a different main content area. The title 'Linux per a persones usuàries de Windows. Introducció a partir de Linkat (o Ubuntu)' is highlighted in yellow. Below it is a table with two rows of pre-registration data.

Horari: Si no et va bé l'actual, quin t'aniria millor?	Nom	Cognoms	Prioritat segons "fractura digital" FTIC	creat
	Luis Jaime	Ortiz Vasquez	3	Dm 09 de Jan, 2007 [12:57]
	MERCE	BONDIA BOVE	3	Dv 12 de Jan, 2007 [19:22]

Alternate version: Mostra les pre-inscripcions ja realitzades, , using PluginTrackerList
