Plugin IncludeURL

Use this wiki plugin to include the body content from a URL into a page, server-side.

Related Plugins: PluginIframe, PluginAJAXLoad, PluginInclude and PluginSnarf.

Parameters

Include the body content from a URL
Introduced in Tiki 15. Required parameters are in **bold**.
Go to the source code
Preferences required: wikiplugin_includeurl

Parameters	Accepted Values	Description	Default	Since
url	url	URL to external file to include.		15.0

Example usage of a full page

This code:

    {includeurl url="https://doc.tiki.org/Included+page+test"}

Would include the content of https://doc.tiki.org/Included+page+test in the current page. Since including a full page can produce unexpected results, it's likely better to use the strategy below.

Example to fetch just the center of a Tiki Wiki page

For:

    {includeurl url="https://doc.tiki.org/tiki-index_p.php?page=Included+page+test"}

Please see: An example of a page including the content of another page
