| <a href="#">Web services</a> | Can receive web services via JSON or YAML.                                                              | Disabled    |
| Default cache                | Cache time in seconds to use if the webservice does not supply "max-age" or "no-cache" in the response. | 300 seconds |

## Wiki - Features

## Wiki - Flagged revision

| Option                            | Description                                                                                            | Default  |
|-----------------------------------|--------------------------------------------------------------------------------------------------------|----------|
| <a href="#">Revision approval</a> | Uses flagged revisions to hide unapproved wiki page revisions from users without necessary privileges. | Disabled |
| Revision approval categories      | List of category IDs for which revision approval is required.                                          | None     |

## Wiki - General preferences

| Option                                             | Description                                                                                                                                                                                                                                                                                                                                                                                           | Default                    |
|----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| <a href="#">Wiki</a>                               | Pages and collaboratively authored documents with edit history.                                                                                                                                                                                                                                                                                                                                       | Enabled                    |
| Wiki homepage                                      | The default home page of the wiki when no other page is specified. The page will be created if it does not already exist.                                                                                                                                                                                                                                                                             | HomePage                   |
| Wiki URL scheme                                    | <p>Alter the SEFURL pattern for page names.</p> <p> Use the "View" action to regenerate your URLs after changing this setting.</p> <p> Replace spaces with dashes   Replace spaces with underscores   URL Encode (Tiki Classic)</p> | Replace spaces with dashes |
| Prevent special characters in page names           | Some characters in a wiki page name may prevent the page from being easily accessible via the URL or wiki links. This option prevents the creation of page names with such characters.                                                                                                                                                                                                                | Enabled                    |
| Wiki link format                                   | <p>Level of special characters acceptable in wiki links for page names. For example: Page éàî</p> <p><i>* "Strict" includes only basic characters such as a-z and 0-9. A site that uses accented or special characters in page names should not use "strict".</i></p> <p> Complete   Relaxed   Strict</p>          | Complete                   |
| Page name display stripper                         | The character(s) to use as a delimiter in the page name. The portion of the name after the character(s) will not be displayed. If the page name display stripper conflicts with the namespace separator, the namespace is used and the page name display is not stripped.                                                                                                                             | None                       |
| Display page name as page title                    | Display the page name at the top of each page as page title. If not enabled, the page content should contain an h1 heading to function as the page title, or the page description can be used as the title.                                                                                                                                                                                           | Disabled                   |
| Display the page name above the page area          | Display the page name in small text at the top of each page (above the page's content).                                                                                                                                                                                                                                                                                                               | Disabled                   |
| Display the page name inside the page content      | Display the page name inside the page content.                                                                                                                                                                                                                                                                                                                                                        | Disabled                   |
| Add an option to hide the page title per wiki page | Enable the page title to not be displayed, on a per-page basis.                                                                                                                                                                                                                                                                                                                                       | Enabled                    |
| Anchor links on headings                           | <p>Cause a link icon to appear on hover over each heading, useful for sharing the URL to an exact location on a page.</p> <p> h1 only   h2 and above   h3 and above   h4 and above   h5 and above   h6 and above   none (disabled)</p>                                                                             | h6 and above               |

| Option                                                                   | Description                                                                                                                                                                                                            | Default         |
|--------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| Show the page description                                                | Display the wiki page description between the page title and the page content.                                                                                                                                         | Disabled        |
| Display input at top of Edit tab                                         | More prominent location than on Properties tab                                                                                                                                                                         | Disabled        |
| Show the page ID                                                         | Each wiki page has a numeric ID and this can be displayed.                                                                                                                                                             | Disabled        |
| Show the page version                                                    | Display the page version information when viewing the page.                                                                                                                                                            | Disabled        |
| Wiki author list style                                                   | Change the list format that is used to display the authors of the page.<br>☰ Creator and Author   Business style   Collaborative style   Page last modified on   none (disabled)                                       | none (disabled) |
| Specify wiki author list style per page                                  | Enable the style in which the author list is displayed to be modified on a per-page basis.                                                                                                                             | Disabled        |
| Encourage contribution to wiki pages by anonymous                        | When a page is not editable because the user is anonymous, display the edit buttons anyway. The visitor will be prompted with a log-in screen and will be encouraged to register in order to be able to edit the page. | Disabled        |
| Show/hide icon before headings                                           | For use with the !!- or !!+ syntax. Activating this will display the show/hide icon at the left of the heading; otherwise, it displays below.                                                                          | Disabled        |
| Wiki page edit buttons location                                          | Specify the location of the Save, Preview, and Cancel buttons on the wiki edit page.<br>☰ Top   Bottom   Both                                                                                                          | Bottom          |
| Wiki navigation bar location                                             | When using the ...page... <i>Wiki page pagination has not been enabled.</i><br>page break wiki syntax<br>☰ Top   Bottom   Both                                                                                         | Bottom          |
| Wiki top line location                                                   | Page description, page actions, icons, backlinks....<br>☰ Top   Bottom   Both   Neither                                                                                                                                | Top             |
| Wiki buttons                                                             | Specify the location of the wiki-specific options (such as Backlinks, Page Description, and so on)<br>☰ Top   Bottom   Neither                                                                                         | Bottom          |
| Undo                                                                     |                                                                                                                                                                                                                        | Disabled        |
| Allow minor edits of wiki pages                                          | Minor edits don't flag new content for translation and don't cause watch notifications to be sent (unless "Watch minor edits" is enabled).                                                                             | Disabled        |
| Allow plugin-specific edits                                              | Add an icon next to each plugin usage to enable editing the plugin in a popup form, without needing to edit the whole page. This feature is unavailable outside wiki pages, whether or not this preference is enabled. | Enabled         |
| Allow section-specific edits                                             | Add an edit icon at the top of each heading-demarcated wiki page section (up to a configurable maximum level) to ease the editing of a single section.                                                                 | Enabled         |
| Only display focused edit icons (for sections and/or plugins) on request | Focused edit icons will only display after a per-session "Edit icons" preference is enabled. This preference is defined directly from any wiki page.                                                                   | Enabled         |

| Option                                                  | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Default        |
|---------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| Section-specific edits maximum level                    | Prevent a proliferation of edit icons for low-level sections. For example, when set to 2, no edit icons will show for third-level (HTML h3) sections.<br>☰ All   1   2   3   4   5   6                                                                                                                                                                                                                                                                                                                                                    | 0              |
| Allow HTML                                              | Per-page option: HTML tags are used to create elements of the wiki page, instead of being displayed as code.<br>⚠ <i>This is potentially dangerous, as it allows raw HTML to be added. Be sure to enable this option only if trusted users can create and edit menus.</i>                                                                                                                                                                                                                                                                 | Disabled       |
| Mandatory wiki page edit summary                        | Reject save attempts that do not include an edit summary describing the changes made.                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Disabled       |
| Footnotes                                               | Logged-in users can write personal footnotes when editing a page. The footnotes display immediately below the wiki page only to the user who edited it. This is a good way for users to make personal notes about pages..                                                                                                                                                                                                                                                                                                                 | Disabled       |
| Position of tags selection                              | Place the tags selection more prominently than under the "Properties" tab.<br>☰ Properties tab   Edit tab   Tags tab                                                                                                                                                                                                                                                                                                                                                                                                                      | Properties tab |
| Warn before page lock timeout                           | Provide a JavaScript alert before the user's lock on a page times out.                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Enabled        |
| Warn on edit conflict                                   | When another user is editing a page, spreadsheet or tracker item, you will be warned about a possible conflict. This feature is useful to prevent collisions when editing.                                                                                                                                                                                                                                                                                                                                                                | Enabled        |
| Edit idle timeout                                       | Select the amount of time (in minutes) after which a user's edit session will expire. If the user does not save or preview their work, it will be lost. Tiki will display a "countdown time" in the user's browser and display an alert when only a minute remains.<br>☰ 1   2   5   10   15   30                                                                                                                                                                                                                                         | 2 minutes      |

## WYSIWYG editor

| Option                                      | Description                                                                                                                                                                                                                                                                     | Default  |
|---------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Full WYSIWYG editor                         | WYSIWYG is an acronym for "What You See Is What You Get".<br>CKEditor is used to provide a word-processor-like editing experience.<br>                                                       | Enabled  |
| Plugin WYSIWYG                              | Use a WYSIWYG editor to edit a section of content                                                                                                                                            | Disabled |
| Full WYSIWYG editor is optional             | If WYSIWYG is optional, the wiki text editor is also available.<br>Otherwise only the WYSIWYG editor is used.<br> Switching between HTML and wiki formats can cause problems for some pages. | Enabled  |
| Full WYSIWYG editor is displayed by default | If both the WYSIWYG editor and the text editor are available, the WYSIWYG editor is used by default, for example, when creating new pages                                                                                                                                       | Enabled  |

| Option                                   | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Default                        |
|------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|
| Reopen with the same editor              | Ensures the editor last used to edit a page or item is used for the next edit as the default.                                                                                                                                                                                                                                                                                                                                                                                                                        | Enabled                        |
| WYSIWYG Height                           | Vertical or tabbed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 300px                          |
| WYSIWYG Preview Style                    | Vertical or tabbed.<br>☰ Vertical   Tab                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Vertical                       |
| WYSIWYG Initial Edit Mode                | WYSIWYG or Markdown.<br>☰ WYSIWYG   Markdown                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | WYSIWYG                        |
| Usage Statistics                         | Send hostname to Toast UI.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Disabled                       |
| Use Wiki syntax in WYSIWYG               | Causes parsed text areas based on wiki syntax when not in WYSIWYG mode to keep using Tiki syntax, instead of HTML as the WYSIWYG editor uses by default. Sometimes referred to as a "visual wiki".<br>👉 <i>Using wiki syntax in WYSIWYG mode will limit toolbar to wiki tools</i><br>⚠️ <i>Existing wiki pages remain in HTML, unless they are converted to non-WYSIWYG and back to WYSIWYG (one by one). CKeditor offers possibilities which may not be expressible in Tiki syntax. See issue #6518 for example</i> | Enabled                        |
| <a href="#">Inline WYSIWYG editor</a>    | Seamless inline editing. Uses CKEditor 4. Inline editing enables editing pages without a context switch. The editor is embedded in the wiki page. When used on pages in wiki format, a conversion from HTML to wiki format is required 🛠️                                                                                                                                                                                                                                                                            | Disabled                       |
| <a href="#">Full WYSIWYG editor skin</a> | ☰ Moono (Default)   Kama   Bootstrap CK   Minimalist   Office 2013                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Moono (Default)                |
| Typefaces                                | List of font names separated by semi-colons (";")                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | sans serif;serif;monospace;... |
| Extra plugins                            | In Tiki, CKEditor uses the "standard" package in which some plugins are disabled by default that are available in the "full" package. See <a href="http://ckeditor.com/presets">http://ckeditor.com/presets</a> for a comparison of which plugins are enabled as standard.<br>👉 <i>List of plugin names (separated by,) 🛠️</i>                                                                                                                                                                                       | bidi,colorbutton,divarea,fi... |
| Wiki paragraph formatting                | When the wiki paragraph formatting feature is on, all groups of non-blank lines are collected into paragraphs. Lines can be of any length, and will be wrapped together with the next line. Paragraphs are separated by blank lines. When the Wiki paragraph formatting feature is off, each line will be presented as you write it. This means that if you want paragraphs to be wrapped properly, a paragraph should be all together on one line.                                                                  | Enabled                        |
| Create line breaks within paragraphs     | When Wiki paragraph formatting is enabled, this option creates line breaks within paragraphs.                                                                                                                                                                                                                                                                                                                                                                                                                        | Enabled                        |
| <a href="#">Ajax</a>                     | Allows for efficient retrieval and display of information from the server, thus improving the user experience. This feature is required for the interface for many features to work.<br>⚠️ <i>This feature is required for the interface for many features to work properly.</i>                                                                                                                                                                                                                                     | Enabled                        |

| Option                         | Description                                                                                                                                                                | Default |
