

# Share

Introduced in [Tiki6](#), this feature allows sending messages to [Social Networks](#), as well as internal messages or forum posts to alert on some wiki page in your Tiki site, etc.

## How to use Share

### Enable the Feature:

Admin home > Features > Global Features > Additional > Share

## Admin Share

**To access:** Click the **Share** icon  on the [Admin Panel](#) or access <http://example.org/tiki-admin.php?page=share>

Set it up in the Share admin panel:

The screenshot shows the 'Share' configuration page in the Tiki Admin interface. At the top, there are navigation tabs: 'Advanced' (selected), 'Access', 'Content', 'System', and 'Tools'. A search bar for preferences is also visible. Below the navigation is a grid of icons representing various system features. The main content area is titled 'Share' and includes a sub-header 'Configure share feature' and an 'Apply' button. Under 'Activate the feature', the 'Share' checkbox is checked. The 'Site-wide features' section contains several options, all of which are checked and marked as 'advanced': 'Display links on the share page', 'Token notification', 'Add contact', 'Display name and email', and 'Number of times accessed'. An 'Apply' button is located at the bottom right of the configuration area.

Click to expand

Once enabled the feature, all pages will have a new icon on the top right corner, to allow the user to share this page with others:

The screenshot shows the Tiki homepage. The top left features the 'tiki wiki cms groupware' logo. A 'System Menu' is visible on the left side. The main content area displays 'HomePage Congratulations' and 'Get started.' instructions. In the top right corner, there is a 'Page actions' menu with options for 'Edit', 'Edit icons', and 'Share'. The 'Share' option is highlighted with a red circle. A 'Log out' link is also present in the top right corner.

Click to expand

Once you click there, you will be offered some options to share the page with, depending on the associated features (internal or related to external social networks) which are already enabled and configured in your site.

## Share with access rights

This feature is useful when sharing content that is not publicly available. The recipients will inherit user's access rights for the shared resource only.

Preferences required: `auth_token_access` and `auth_token_share`.
