

This feature is no longer supported or relevant because browsers now have spellchecking, and that's where it should be handled.

Spellchecking Admin

Each Tiki [feature](#) may have its own spellchecking option.

Articles

To enable spellchecking with creating or editing [articles](#), select the **Spellchecking** option in the **CMS Features** section of the [Articles Config](#) page.

CMS Features section of the Articles: Config page.

Wiki

To enable spellchecking with creating or editing a [wiki](#) page, select the **Spellchecking** option in the **Wiki Features** section of the [Wiki Config](#) page:

Wiki Features section fo the Wiki: Config page.

I mportant note about installation

Spellcheck is **not** bundled. You must get the language file from Sourceforge and import the data with phpMyAdmin or similar.
