The user can take each survey only once, but the admin can take a survey as many times as he or she wants. If you allow anonymous users to take surveys, users will be able to take a survey many times if they clear their cookies. If you want to enforce only one vote per user, make surveys available to registered users only.
Taking a survey

When you click on a survey name in the listing (or at this icon), you will be able to fill out the survey form (tiki-take_survey.php?surveyId=1, for survey 1, for instance).

**Survey stats**

If you have the right permissions, you can see stats for a survey. Under the survey listing, click on the lens icon (tiki-survey_stats_survey.php?surveyId=1):
