2012-09: A new Server Check script has been developed that will make everything easier! Just upload a single PHP file to your server and you will get advice on your server configuration.

Tiki Installation Guide

This **Tiki Installation Guide** includes information for installing Tiki in a number of different environments.

You don't have to be a web developer or programmer to install Tiki. Tiki includes an easy-to-use, wizard-based installer (the **Tiki Installer**) which will do most of the work for you. For some items, you will need access to your webhost's control panel.

You might consider using Tiki Hosting — webhosts that support Tiki. Many of these hosts will install Tiki for you free of charge.

Tiki is also available as a one-click installation from many popular web host applications (such as Fantastico, SimpleScripts, and Jumpbox). Consult your webhost for details.

The Tiki documentation is a community effort. We invite you to join us! See http://doc.tiki.org/Welcome+Authors.
