Attachments

In Tiki, files can be attached to Wiki pages, Trackers, Forums posts, and so on.

For the wiki, to enable attachments:

2. For user groups to be able to view and attach files, the permissions wiki_view_attachments, and wiki_attach_files must be assigned to at least one of the Groups the user is a member of.

These two permissions allow the viewing and uploading of attachments. By default, deleting an attached file is only possible for the one who uploaded the file or for site administrators. A global ability to delete attachments can be granted to a group if the permission tiki_p_wiki_admin_attachment is assigned to the group.
