

Wizards

Starting in [Tiki12](#), some wizards were added to Tiki to help in the initial setup based on configuration templates like "Macros" (**Profiles Wizard**), as well as further site configuration (**Admin Wizard**), to help you while upgrading your tiki site to see what's new (**Changes Wizard**), and to help you as site admin to collect more information from your users if you need it (**Users Wizard**).

- [Profiles Wizard](#)
- [Admin Wizard](#)
- [Changes Wizard](#)
- [User Wizard - Set up the User Details screen](#)

The screenshot shows the Tiki Setup wizard interface. At the top left is the Tiki logo (wiki cms groupware). In the top right corner, there is a 'Log out' link. Below the logo, there is a 'Show on admin log-in' link and a 'Start the Wizardry' button with a 'Close' button next to it. The main heading is 'Tiki Setup'. Below this is a 'Get Started' section. A green message states: '✓ Congratulations! You now have a working instance of Tiki 21.3vcs. You may start using it right away, or you may configure it to better meet your needs, using one of the configuration helpers below.' Below this is a 'Tip' box: 'Mouse over the icons to know more about the features and preferences that are new for you. Example:'. The main content area is divided into three sections, each with an icon and a 'Start' button. The first section is 'Configuration Profiles Wizard' with a key icon and a yellow 'Start Configuration Profiles Wizard (Macros)' button. The second section is 'Configuration Wizard' with a gear icon and a blue 'Start Configuration Wizard' button. The third section is 'Changes Wizard' with an upward arrow icon and a green 'Start Changes Wizard' button. Below these is a 'Control Panels' section with a blue 'Go to the Control Panels' button. The last section is 'Server Fitness' with a red 'Go to the Tiki Server Compatibility Check' button. At the bottom right, there is a 'Start the Wizardry' button and a 'Close' button.

Tiki Setup

Get Started

✔ Congratulations! You now have a working instance of Tiki 18.7svn. You may [start using it right away](#), or you may configure it to better meet your needs, using one of the configuration helpers below.

Tip

Mouse over the icons to know more about the features and preferences that are new for you. Example:

12

 You may start by applying some of our configuration templates through the **Configuration Profiles Wizard**. They are like the **Macros** from many computer languages. [?](#)

Start Configuration Profiles Wizard (Macros)

 Alternatively, you may use the **Configuration Wizard**. This will guide you through the most common preference settings in order to customize your site. [?](#)

Start Configuration Wizard

 Or you may use the **Upgrade Wizard**. This will guide you through the most common new settings and informations in order to upgrade your site. [?](#)

Start Upgrade Wizard

 Use the **Control Panels** to manually browse through the full list of preferences.

Go to the Control Panels

Server Fitness

To check if your server meets the requirements for running Tiki version 18.7svn, please visit [Tiki Server Compatibility Check](#).
