Plugins tab

Overview
Use this tab to enable a specific Wiki Plugin

To Access
From the Editing and Plugins page, click the Plugins tab.

Note
The plugins listed on this tab correspond to the PHP files in your ../lib/wiki_plugins/ directory. If you recently installed a new plugin, you may need to clear the Tiki cache.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
<th>Default</th>
</tr>
</thead>
<tbody>
<tr>
<td>Automatically approve wiki-plugins on pages installed by profiles</td>
<td>Some wiki-plugins require admin approval before they are executable. If turned on, then all wiki-plugins that are on wiki pages created via profiles are automatically approved. <strong>⚠️ Make sure your profiles are not executable or editable by untrusted users.</strong></td>
<td>Disabled</td>
</tr>
<tr>
<td>Plugin pending approval notification</td>
<td>Send an email alert to users with permission to approve plugins when a plugin approval is pending</td>
<td>Disabled</td>
</tr>
<tr>
<td>Default for img-fluid class used in the IMG plugin</td>
<td>Default option for whether an image produced with the IMG plugin has the img-fluid class - a plugin parameter allows this to be overridden</td>
<td>Enabled</td>
</tr>
<tr>
<td>Maximum plugin parsing passes</td>
<td>Affects the number of wiki plugins that can be used. The default of 500 allows for 1 plugin nested seven times, or 44 plugins nested once. A value of 1200 is required for 1 eighth level plugin. <strong>⚠️ Setting this to a higher value than the default of 500 may have performance implications.</strong></td>
<td>500 passes</td>
</tr>
<tr>
<td>Allow plugin-specific edits</td>
<td>Add an icon next to each plugin usage to enable editing the plugin in a popup form, without needing to edit the whole page. This feature is unavailable outside wiki pages, whether or not this preference is enabled.</td>
<td>Enabled</td>
</tr>
<tr>
<td>Only display focused edit icons (for sections and/or plugins) on request</td>
<td>Focused edit icons will only display after a per-session &quot;Edit icons&quot; preference is enabled. This preference is defined directly from any wiki page.</td>
<td>Enabled</td>
</tr>
<tr>
<td>GUI for the list plugin</td>
<td>Experimental GUI for the list plugin in popup plugin edit forms. (listgui) <strong>⚠️</strong></td>
<td>Disabled</td>
</tr>
<tr>
<td>Plugin trackerlist converter</td>
<td>Button on trackerlist and trackerfilter plugins edit form to convert them to use the list plugin instead. <strong>⚠️</strong></td>
<td>Disabled</td>
</tr>
