

관리: 위지위그

설정	설명	기본
위지위그 편집기 기능		
위지위그 편집기는 선택사항입니다:	이 기능을 활성화하면 모든 사용자가 위키와 위지위크 편집기 사이에서 전환하는 것을 허용합니다	
위지위그 편집기가 기본으로 표시됩니다:	이 기능을 활성화하면 기본으로 위지위그 편집기를 선택합니다	
Reopen with the same editor:	Enabling this feature ensures the editor last used to edit a page or item is used for the next edit as the default	enabled
Content is parsed like a wiki page:	Enabling this feature ensures pages and items created using the Wysiwyg editor would also include Wiki parsing for plugins and inline character styles (but see next option)	
Content is partially wiki parsed:	Enabling this feature ensures pages and items created using the Wysiwyg editor would also include Wiki parsing for plugins BUT NOT some other wiki syntax such as inline character styles (above option must be enabled)	
Use Wiki syntax in WYSIWYG:	Enabling this feature is experimental in 6.x. Wiki syntax can also be used when using Wysiwyg editor, but the handy Plugin Editor then only works in Wysiwyg Source mode (note: <i>Ajax auto-save</i> must be enabled if using this feature)	
Wysiwyg editor skin:	Select your preferred Wysiwyg Editor Skin	
Font names:	List of Font Names - note: must be separated by the ; (semi-colon character)	
Related Features		
Wiki paragraph formatting:	Enabling this feature affects whether multiple lines appear as a paragraph or not	
But still create line breaks within paragraphs:	When Wiki paragraph formatting is enabled, this option creates line breaks within paragraphs	enabled
Ajax:	Enabling Ajax allows page updates without having the Tiki site having to perform a browser refresh	
Ajax auto-save:	Enabling this feature allows the Wiki service to automatically save edits	

Click the **Toolbars** button to modify the [WYSIWYG toolbars](#).

Page links

Note that if the SEFURL feature is on, page links created using wysiwyg might not be automatically updated when pages are renamed. This is planned to be addressed through the future "Use Wiki syntax in WYSIWYG" feature.

Wysiwyg Editor Features

☒
Wysiwyg Editor is optional
Requires [Wysiwyg editor](#) (OK)

☒
Wysiwyg Editor is displayed by default

☒
Reopen with the same editor
