

Apply Profiles tab

Overview

Use this tab to select an apply a profile from a repository to your Tiki

To Access

From the [Profiles Admin](#) page, click the **Apply Profiles** tab.

Note

Starting in [Tiki3](#) the profile system is a powerful and versatile system that can be managed by the Tiki community. See <http://profiles.tiki.org>. Profiles give the installer a choice of partially configured sites to install. They give a head start on the configuration process by picking a type of site that is similar in purpose.

Profiles ⊕

Apply Profiles: **Advanced**

Configure Tiki in 3 easy steps using Profiles

Profiles

Step 1: Use the Quick or Manual Filter option to see a list of Profiles you can apply

Option 2: Manual Filter

Filter the list of profiles:

Profile:

- 3.x
- 4.x
- 5.x
- 6.x
- Featured profiles

Categories: Full profile (out of the box & ready to go)

Repository: <http://profiles.tiki.org>

Step 2: Click on a Profile to review and see description

Profile	Repository	Categories
Collaborative_Community_6x	profiles.tiki.org	beta, Featured profiles, 6.x
stetitle	Our community	
steeztitle	Log on, Learn, Share	
browzertitle	Community Wiki	

Step 3: Click on Apply Now to apply Profile

Apply Profiles tab

Setting	Description	Default
Fieldset or section		
Field name	Description	Value

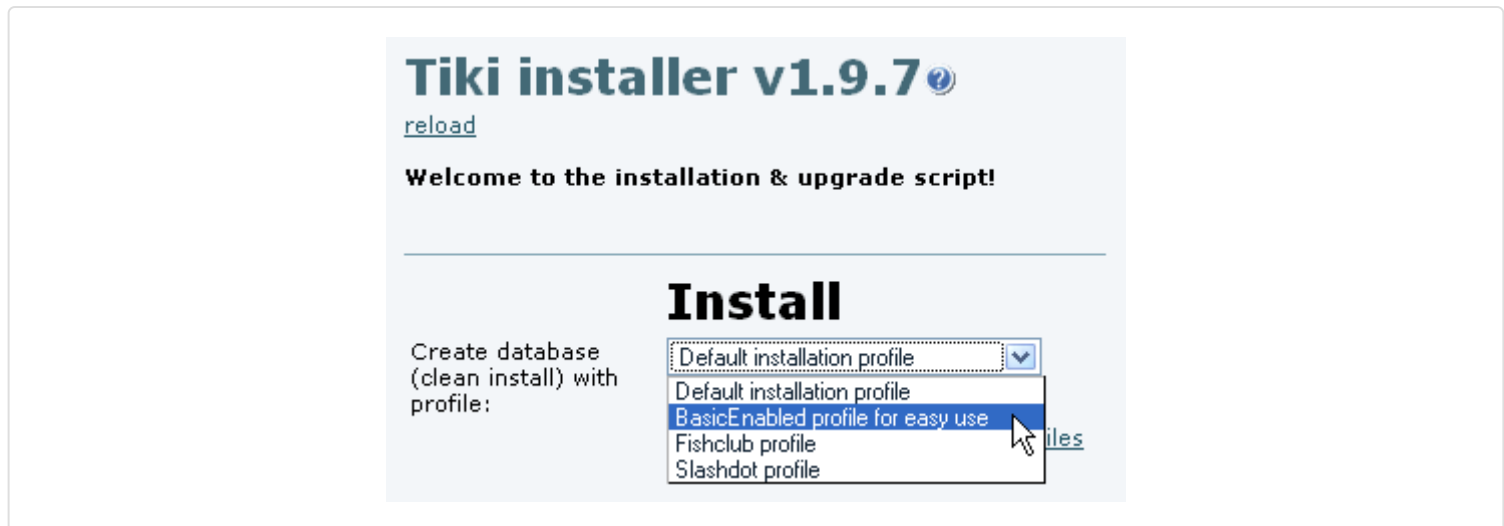

Starting in version 2.x (as a hidden feature) and specially after 3.x, you can point your browser to **tiki-admin.php?page=profiles** ("Admin home > Profiles"), allowing to set up at any time bunches of features in a certain way to produce specific use case of interest.

New Tiki 2.x and 3.x profile system

⋮

Old profile system (< Tiki 2.x)

In Tiki 1.9, profiles were only active during the installation process. You could not go back and pick a different profile unless you re-installed the database, losing all your changes.

Selection of profile at <http://yourdomain/tiki-install.php?lang=XX>

Requirements

Your php must have the option [allow_url_fopen](#) On or must have the library [curl](#) installed. Javascript must also be enabled on your browser

Details of Supported Profiles

Tiki 3.x

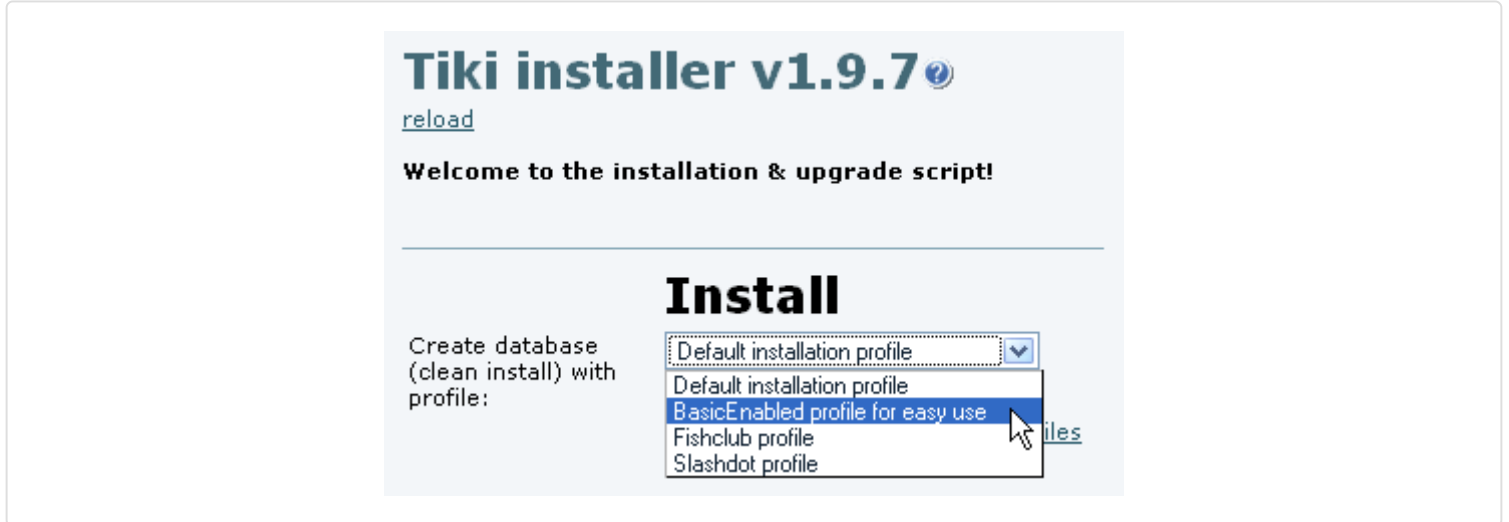

See <http://profiles.tiki.org>

Tiki 3.x

See <http://profiles.tiki.org>

"Profiles" up to Tiki 1.9.x was a `feature` used only when you `install` Tikiwiki. It set up the Tikiwiki according to an existing configuration that was "saved" from another site.

Until version 2.x, this feature is only active during the installation process. You could not go back and pick a different profile unless you re-installed the database, losing all your changes.
