

Using Calendars

The *calendar* is a feature-rich resource to help track site modifications as well as organize, and collaborate with individuals & groups around the world using the user-friendly architecture of Tiki. Tiki's [Calendar](#) feature makes use of practically all of the features you might find in other web calendars, while also fully integrating the other features of TikiWiki such as categories, wikis, blogs, galleries, and many others!

Depending on how the Tiki administrator has configured the Tiki site you're using, you may be able to do some or all of the following:

- View a list of all available calendars on your Tiki site
- View a calendar
- Create a calendar
- Add a new event to a calendar
- Edit or delete a calendar event
- Print a calendar

The screenshot shows the Tiki Calendar interface for July 2013. At the top, there are navigation buttons: "Admin Calendars", "Add Event", "Export Calendars", "List View", and "Visible Calendars". Below these are category filters: "Altres Congressos, Cursos i Seminaris", "Altres Reunions", "Cursos propis", "Seminaris", "(Intern)", and "Seminars". A date selector shows "2014-03-07" and "today". The main calendar grid is for July 2013, with days of the week (Mon to Sun) and dates (1 to 21). Events are listed in colored boxes within the grid cells. For example, on Monday 1st, there is a "10a Curs 'Estadística Avançada per a la Investigació Biomèdica'". On Tuesday 2nd, there is a "9:30a Jornada 'Advancing towards Personalized Medicine: the role of Bioinformatics'" and a "3p Videoconferència". On Wednesday 3rd, there is a "10a Curs 'Estadística Avançada per a la Investigació Biomèdica'", a "11:30a Session at Summe(R) School MEIQ/UB-UPC: 'Web 2.0 interfaces for R'", and a "3:30p Seminar.
