ColorBox for JQuery

Since Tiki 4.0 ColorBox is a new jQuery plugin which is replacing ShadowBox visual effects.

screenshot will come here

Usage Examples

this code:

```html
{img src="http://farm3.static.flickr.com/2091/1532249675_5f917a49ac_s.jpg"
link="http://farm3.static.flickr.com/2091/1532249675_5f917a49ac_b.jpg" title="Some Image from flickr.com site... bla bla bla bla bla bla bla bla bla bla bla bla bla bla bla bla bla bla bla bla bla bla bla..."
rel="shadowbox"}
```

produces:

![x](http://farm3.static.flickr.com/2091/1532249675_5f917a49ac_s.jpg)

ColorBox "Gallery"

and this way you can have more images in wiki page displayed in the shadowbox as a gallery:

```html
{img src="http://farm3.static.flickr.com/2091/1532249675_5f917a49ac_s.jpg"
link="http://farm3.static.flickr.com/2091/1532249675_5f917a49ac_b.jpg" title="Some Image from flickr.com" rel="shadowbox[gallery]"}
{img src="http://farm2.static.flickr.com/1185/1467868764_898ec5daf3_s.jpg"
link="http://farm2.static.flickr.com/1185/1467868764_898ec5daf3_b.jpg" title="Old Port in Trogir by luci" rel="shadowbox[gallery]"}
{img src="http://farm3.static.flickr.com/2212/1532365551_6856d00717_s.jpg"
link="http://farm3.static.flickr.com/2212/1532365551_a1ad132f1c_o.jpg" title="Sun Going Down by luci" rel="shadowbox[gallery]"}
```

results in:

![x]![x]![x]

Using html code with SEURL activated

Note: due to specific settings at doc it is not possible to call images directly using displayfileId or tiki-download_file.php?fileId=fileId&display. It should work fine on your Tiki.

Wanna YouTube video in the box?

```html
<a href="display109" data-box="box[g]">Using html code</a>
```

watch it here:

You Tube video in their flash player
A button opens content in a box

```html
{BUTTON(href="HomePage",_rel="box",_text="Go there")}{BUTTON}
```

will create a button that opens the `HomePage` in a colorbox:

Go there

**Inline content in a *box trick**

```html
[#helloworld|Click Me !|shadowbox;width=280;height=180;title=Login Box]
{BOX(id=helloworld,class=wiki-edithelp)}{TAG(tag=div,style=background-color: white !important;)}

::__Hello world !__:: {MODULE(module=login_box)}{MODULE} ::Thank you for trying me !:: ---
{TAG}{BOX}
```

looks like:

**Click Me !**

Content loaded using Ajax

**Example1**

**Code:**

```html
{JQ()}$jq("#ajaxload a").colorbox({ href: function(){ return $jq(this).attr('href')+' .wikitext'; } });
{JQ}{DIV(id="ajaxload")}{tiki-index_raw.php?page=HomePage|Content of a wiki page in ColorBox}{DIV}
```

**Result:**

**Content of a wiki page in ColorBox**

**Example2**

**Code:**

```html
```

**Result:**

**Content of a wiki page in ColorBox**
