

Faceted search

"Faceted search, also called faceted navigation or faceted browsing, is a technique for accessing information organized according to a faceted classification system, allowing users to explore a collection of information by applying multiple filters. A faceted classification system classifies each information element along multiple explicit dimensions, called facets, enabling the classifications to be accessed and ordered in multiple ways rather than in a single, pre-determined, taxonomic order." Source:

https://en.wikipedia.org/wiki/Faceted_search

This requires Elasticsearch and is configured at `tiki-admin.php?page=search` -> Search Results

~~As of July 2016: If you want to use Faceted Search, you should stick to Elasticsearch 1.x. Facets have been removed in 2.0, and replaced by the "more powerful and flexible aggregations framework." but the Tiki code has not yet been updated to use this. Source:~~

~~https://www.elastic.co/guide/en/elasticsearch/reference/2.0/breaking_20_removed_features.html#_facets_have_been_removed fixed in 15.3~~
