Funcionalitats de TikiWiki

TikiWiki és un del sistemes de gestió de contingut (SGC) més plens de funcionalitats del món. A diferència d'altres projectes de codi obert que inclouen només un petit conjunt de característiques i animen a instal·lar-se extensions de 3rs llocs, la comunitat del Tiki ha escollit incloure el mà xim nombre de funcionalitats possibles en el dipòsit central de codi CVS. Això ajuda a que, a diferència d'altres projectes, quan fas una actualització, les teves característiques no quedaran trencades. Tanmateix, no totes les característiques són igual de plenament desenvolupades, així que aquesta pà gina proporciona una puntuació de les funcionalitats ajudan-te a valorar si Tikiwiki és adequat per a tu.

Feature name and link	Description
We eat our own DogFood	Tiki is a community. Tiki is a software. The Tiki community is recursively using and improving the Tiki software, which is used to support the community as well as to make available to the general public.
Open Development	Written and maintained by an active and international community of volunteer contributors. While many developers offer consulting services, no company controls the development. Think of Tiki as applying the wiki way not just to content but also to software development. YOU are invited to participate!" Please read more about the Tiki Model
Open standards and protocols	Tiki developers are Tiki users too and prefer open protocols and standards - http://tiki.org/TikiStandards.
Platform independence	Tiki runs wherever PHP runs, on Linux, Mac, Windows and many more other operating systems.
Browser Compatibility	On the client side, all you need is a Web browser running on a desktop computer, laptop, tablet, or smartphone.
Documentation	Tiki's documentation is a wiki (of course!). So you can participate! The are links from your installed Tiki application directly to the corresponding documentation wiki page. As the documentationis constantly being updated and organized, broken links may sometimes occur. Please bear with us and feel free to participate!
External Libraries	Tiki makes good use of existing and active open source projects such as Zend Framework, Smarty, MySQL, PHP, jQuery, Bootstrap, CKeditor, etc.

Notes generals: sobre les funcionalitats de Tikiwiki

Tiki Wiki CMS Groupware (â€œTikiâ€) ofereix un número molt gran de característiques funcionals en quedar feta la instal·lació base, raonablement més que qualsevol altre aplicació Web de codi obert. És tan ple de funcionalitats que pot ser aclaparador, fins i tot per a un usuari experimentat o administrador. Tiki té tot el clà ssic de funcionalitats d'un portal SGC, però també té algunes que encara no són disponibles en altres aplicacions similars. Altament configurable i modular, totes les característiques són opcionals i és administrat via un interfície basada en web. El que fa a Tiki tan potent és la integració tan ben enllaçada de totes les funcionalitats.

Tiki és un projecte molt actiu. En mitjana, hi ha una contribució al codi (una correcció d'un error, una característica nova, etc) cada 2 hores. Així que, amb el temps, les característiques esdevenen millors. És un projecte de codi obert així que també tu pots participar a fer-lo millor!

Al voltant de 170 persones han contribuït al codi font. Algunes característiques són à mpliament i molt estables mentre altres ja no són mantingues o tenen errors. La auto-avaluació prèvia t'ajudarà a saber què esperar. Totes característiques són opcionals, així que pots triar i escollir el que necessites pel teu projecte. Si ets principiant, aferrat a característiques que han estat avaluades majorità riament com a As i Bs.

Per millorar la llista, si us plau, connecta't i punxa en el nom de la característica. Si us plau, omple la

informació pendent i corregeix el que sents que és incorrecte. I sents que la característica X mereix una B en comptes d'una D, endavant, si us plau! (Tots els canvis seran revisats per un administrador del projecte, i revertits, si cal.) També pots afegir comentaris. Per exemple: "crec aquesta característica mereixerà un "B" quan aquesta opció sigui oferta"

Si vols informar d'un error o suggerir una millora d'una funcionalitat, empra, si us plau emprar el nostre formulari d'errors i llista de peticions. Les funcionalitats i puntuacions prèvies es basen en la darrera versió estable de Tiki (1.9.7 actualment). De totes formes, encara no totes les funcionalitats existents han estat afegides. Encara manquen moltes extensions (plugins), per exemple.
