

Select2 has replaced Chosen in Tiki23

## Improve Tracker Forms

You can improve tracker forms enabling an experimental jquery user interface library called "**Chosen**"

Enable the feature

You can enable the feature in:

**Admin home > Features > Interface (tab) > jQuery plugins and add-ons > Experimental > jQuery-ui Chosen Menu**

The screenshot shows the Tiki23 Admin panel with the 'Interface' tab selected. The 'jQuery UI Theme' is set to 'flick'. Under the 'Experimental' section, the 'jQuery-ui Chosen Menu' checkbox is checked and highlighted with a red box. Other features like 'jQuery Infinite Carousel', 'jQuery Sortable Tables', and 'jQuery-ui Select Menu' are also visible. The 'Mobile' section shows 'Mobile Access' is disabled with a warning icon and a message: 'You need to set Perspectives'. An 'Apply' button is at the bottom.

Remember that you need to have your "Preference Filters" in the admin panel with the "Advanced" and "Experimental" options enabled in order to see this feature checkbox.

## Features

The screenshot shows the 'Preference Filters' section with four checkboxes: 'Basic' (checked), 'Advanced' (checked), 'Experimental' (checked), and 'Unavailable' (unchecked). A 'Set as my default' button is to the right.

## Drop downs

You can choose a value from a dropdown box by selecting the items in the list through scrolling down, as usual, or you can nowadays filter the list values based on the text you type at the top.

**Subject \***

*Subject or short summary of the issue (max 255 characters)*

**Importance**

*10: Popular feature request, no problem, no workaround on default install 5: Minor annoyance, no problem, no workaround on default install 1: Edge case or rare problem, no workaround*

**Easy to solve?**

*10 Easy: 5-10 minutes to fix, no risk of regression, etc. 5 Medium: a few hours of work 1 Difficult: Requires days of work*

**Feature**

**Category \***

*Category of the issue*

**Tiki Version** ☐ 10.x ☐ 11.x

Click to expand

## Multiple selection

Similarly, a section to allow multiple selection of items can be shown in a small but enhanced dropdown box, which allows the user to select one or many of the options, remove them from the list in the text field at the top:

**Easy to solve?**

*10 Easy: 5-10 minutes to fix, no risk of regression, etc. 5 Medium: a few hours 1 Difficult: Requires days of work*

**Feature**

**Category \***

*Category of the issue*

**Tiki Version** ☐ 8.x ☐ 9.x

Click to expand

## Filtering displayed options by typed text

Additionally, you can also filter the values displayed in the dropdown so that only those matching your

typed text are shown in the list (only the ones starting with "D" in the example below: Documentation and Dogfood a \*.tiki.org site.

Easy to solve?
