You can create Machine Learning models from scratch or from templates

Templates

The template is the best approach to begin creating your machine learning model. It allows us to create a machine learning model based on commonly observed problems, for example the MLT.

Available Templates

Actually Tiki only support one template :

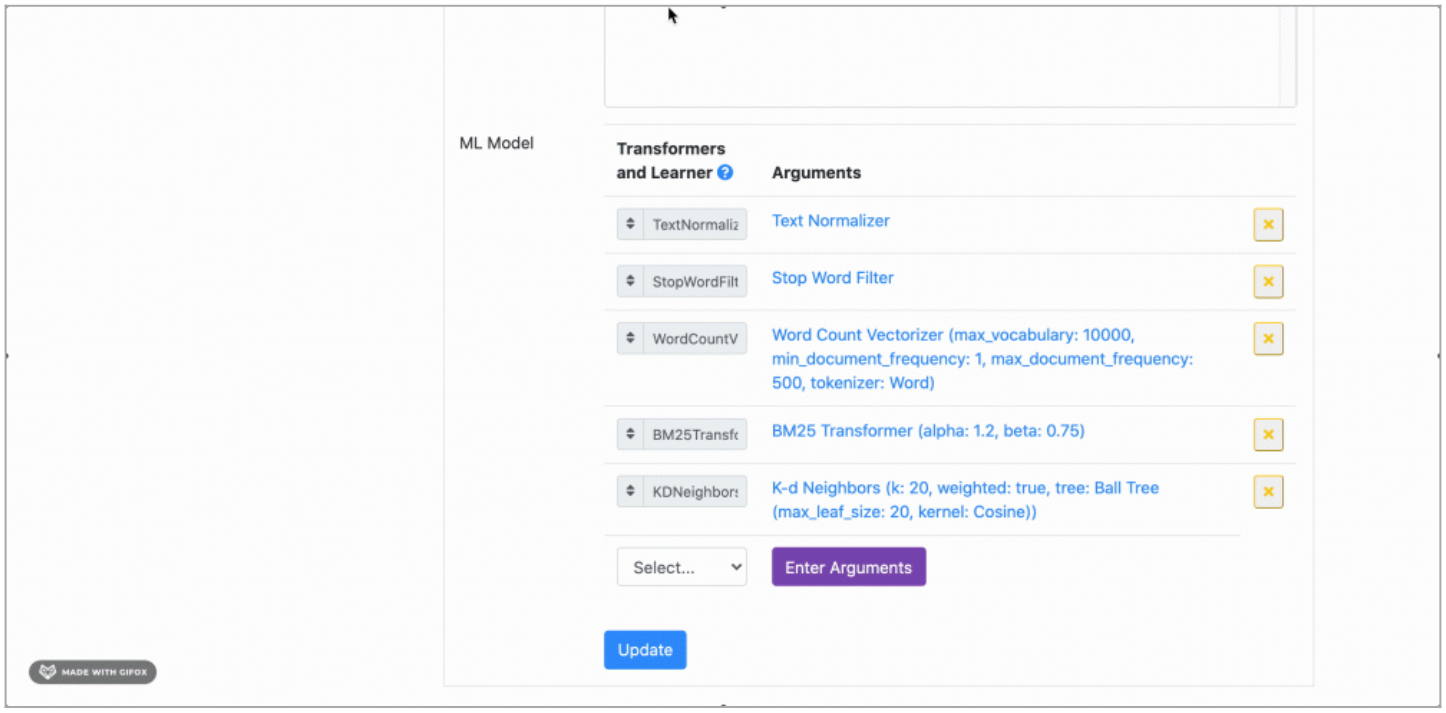

More Like This (MLT)

The MLT template solves the problems associated with suggesting similar content (finds documents that are "like" a given set of documents).
This emulates Module More Like This
More info: https://github.com/RubixML/RubixML/issues/75

Transformers and Learners for MoreLikeThis

Transformers and Applied Learners	Arguments
TextNormalizer	
StopWordFilter	
WordCountVectorizer	maxVocabulary :1000 , minDocumentFrequency :1 ,maxDocumentFrequency: 500 ,okenizer :default

Transformers and Applied Learners	Arguments
BM25Transformer	alpha :1.2 , beta :0.75
KDNeighbors	k:20, weighted:true, tree : BallTree
