To Access

From the [Meta Elements](#) Admin page, click the **Meta Tags** tab.

Note

Many search engines use this information to index your site and to format information on results pages.

Option	Description	Default
Keywords	A list of keywords (separated by commas) that describe this website.	None
Include tags	If the Tags feature is enabled, the tags for each page with tags set will be used as meta keywords. This allows individual pages at the site to have different meta tags.	Disabled
Use thread title instead	Use the forum thread title in the meta title tag.	Disabled
Description	A short description of the website. Some search engines display this information with the website's listing.	None
Page description	Use each page description as the title meta tag for that page.	Disabled
Custom Meta robots	Add the ability to set custom meta robots on each wiki page that will override the global meta robots value.	Disabled
Author	The author of this website. Typically this is the Admin or Webmaster.	None
Twitter site name	The default website name that will be used by Twitter (twitter:site) for every web page. This parameter will be used instead of the browser title.	None
Twitter site image	The default image (logo, picture, etc) that will be used by Twitter (twitter:image) for every web page. The image must be specified as a URL.	None
Facebook site name	The default website name that will be used by Facebook (og:site_name) for every webpage. This parameter will be used instead of the browser title.	None
Facebook site image	The default image (logo, picture, etc.) that will be used by Facebook (og:image) for every webpage. It must be specified as a URL. The minimum valid image size is 200x200px. However, Facebook recommends 1200x630px or larger for the best display on high resolution devices.	None
