

# Mod extcalculator

**Extcalculator** is a kewl little calculator for your right or left column within TikiWiki.

## Install

See [Mods Admin](#) for instructions on how to install a Mod. This mods is called **extcalc**

## Usage

Once installed, you will see it under "Admin > Modules" (**tiki-admin\_modules.php**):

You can assign a this [Module](#) to a lateral column (See [Module Admin](#) page if needed), or you can include it within a wiki page, using the [PluginModule](#).

The assigned module looks like this:

And you can compute simple mathematical operation with it.

[help](#) By the time of this writing (July 2007) the mod didn't show completely under many theme styles (last column of buttons on the right was hidden by dental column in Tiki).

not fully shown

Screenshot of complete module extcalc was taken with simple.css theme style.

Also, links to frequently used icons are included below and the attached photos here are used throughout the

module and plugin pages through use of [PluginAttach](#).

*Since Tiki6 headings from includes are not showing up correctly in the maketoc plugin, so use the below as a workaround:*

startinclude1a

See these pages for information that applies for all modules:

- [Module](#)--Overall introduction and overview
- [Module Admin](#)--Introduction to the module admin pages for site-wide and individual module settings
  - [Assigning Modules](#)--How to select a module to configure it
  - [Module Settings Interface](#)--Interface for configuring individual module settings
  - [Module Settings Parameters](#)--Explanation of standard parameter settings for modules
  - [Creating Custom Modules](#)--How to create user modules
- [Index of Modules](#)--Links to the documentation of individual modules
- [User Modules](#)--how (if the feature is active) users can choose and place their modules
- [Mods Type Modules](#)--links to modules that are installed as components

stopinclude1a

startinclude2
