

This is a [stub](#)

It makes a graph with all the linked pages from your page. Works well with [Tiki3 LTS](#), but not with [Tiki6 LTS](#).

## Example 1:

## Example 2:

Create a page called "Menu", and add 4 links to other pages (one of them, called "Instructions"). Then add a link in your homepage to the same page "Instructions". Then, in the homepage, add this syntax:

```
{WIKIGRAPH( level=>1) }Menu{WIKIGRAPH}
```

You will end up seeing something like this:

Backlinks...

# HomePage

```
graph LR; Menu --> community; Menu --> homepage; Menu --> wiki_help[wiki help]; homepage --> Instructions; wiki_help --> Instructions;
```

**Menu**

- [Instructions](#)
- [homepage](#)
- [community](#)
- [wiki help](#)

*This is just a sample menu - edit it*

[My account](#)

- [Home Page](#)
- [Last changes](#)
- [Forums](#)
- [FAQS](#)

**Thank you for installing the Collaborative Community Profile**

We recommend you visit the [Instructions](#) page to learn how to manage and use this profile

You need [GraphViz](#)

See in action here:

<http://workflow.tiki.org/graphviz>
