

This page [needs review](#)

Module last_articles

This [module](#) displays the most recently submitted [articles](#), in reverse chronological order, and provides a link to each page.

Usage

You will see it listed at "Admin > Modules > Assign new module > Module Name (drop down)" (**tiki-admin_modules.php**).

You can assign a this [module](#) to a lateral column (See [Module Admin](#) page if needed), or you can include it within a wiki page, using the [PluginModule](#):

```
{MODULE(module=>last_articles) /}
```

Parameter	Value	Description	Default
type	string	one of the article type value(ex:Article)	any optional
topicId	ID	topic ID	any optional
topic	string	topic name (be careful that if you change the topic name the module will not be updated)	any optional
categId	ID	categoryId	any optional
lang	string	the iso_639_1 code (ex:en)	any optional
offset	integer	start at specified offset from top (zero is most recent)	0 optional
showImg	interger	Width of the image	0 optional
showDate	y or n	show the date	n optional
showHeading	numeric	max characters of the heading to show. -i for no truncation	n optional
nonums	y or n	displays the line number	n optional
absurl	y or n	displays a relative or absolute link	n optional
more	y or n	displays a more button that links to the articles homepage	n optional tw>=1.10

- 'offset' is new in 3.0

See [PluginModule](#) for additional parameters that can be used.

The assigned module looks like this:

```
MODULE(module=last_articles, showHeading=y, showDate=y, max=5) /}
```

If you see the error message: "Sorry, no such module last_articles" then edit the plugin and choose one of the article modules that are included in your version of tiki

Insert Module ✕

Displays a module inline in a wiki page. More parameters can be added, not supported by User Interface.

Module Name	<input type="text" value="Action calendar (action_calendar)"/>
	<small>Module name as known in Tiki</small>
Max	<input type="text" value="5"/>
	<small>Number of rows. Default: 10</small>
Title	<input type="text" value="Show title"/>
	<small>Show/hide</small>
showHeading	<input type="text" value="y"/>
	<small>showHeading</small>
topicId	<input type="text" value="1+2+3+4"/>
	<small>topicId</small>
showDate	<input type="text" value="y"/>
	<small>showDate</small>
