

This page [needs review](#)

Quick Edit Module

This [Module](#) allows users (with [permissions](#)), to create or edit wiki pages. Simply type the name of a wiki page and click **Edit**.

- If the page exists, Tiki will open the Edit screen for the page.
- If the page does not exist, Tiki will create the page.

Note: The name of the wiki page must conform to the character link format, as defined on the [Wiki Link Formatting field](#).

Usage

You will see it listed at "Admin > Modules > Assign new module > Module Name (drop down)" (**tiki-admin_modules.php**).

You can assign a this [Module](#) to a lateral column (See [Module Admin](#) page if needed), or you can include it within a wiki page, using the [PluginModule](#).

```
{MODULE(module=quick_edit) /}
```

The assigned module (with its default values) looks like this:

Quick Edit a Wiki Page

Valid parameters for this module include:

Parameter	Value	Description	Default	Optional?
templateId	numeric	Wiki template (ID) to use when creating the page. See note below on how to find the ID of a particular template.	None	Y
size	numeric	Size of the Create/Edit Page field	15	Y
catgId	numeric	Category (ID) to assign to newly created page.	None	Y

Parameter	Value	Description	Default	Optional?
mod_quickedit_heading	alphanumeric	Title of the module	None	Y
submit	string	Label of the submit button	Create/Edit	Y
action	URL	Target of the form	tiki-editpage.php	Y

Tiki 6+ parameters

Parameter	Value	Description	Default	Optional?
addcategId	numeric	If set, pages created through the module have this category prechecked to be categorized in. Different from categId which gives no chance to add more categories	None	Y
customTip	text	Custom text to be shown as a tip at the top of the edit page that appears as a result of this quick edit	None	Y
customTipTitle	text	Title of the above tip shown	None	Y
headerwiki	text (wiki page name)	Wiki page of which the contents will be shown on top of the edit page (useful for instructions on how to edit etc...	None	Y
input field for copy/paste	text	Add a text area for copy/paste page content	None	Y
show description field	text	Add a text field to enter the page description (requires feature_wiki_description)	None	Y
choose category	dropdown	Allows the user to choose a category instead of preselecting one	None	Y

To find the ~templateID~ for a particular template, do:

- Admin menu (usually on the left) > Content Templates
- Locate the template you want, and click on the pen icon in that row (in Action column)
- Look at the url, and find the ~templateID=nn~ part. This gives you the ID.

The module can be used to create an auto-complete page search by setting action to *tiki-index.php*.
