# Notifications

**Note:** Notifications were introduced in Tiki13 and were expected to replace the similar feature "User Watches" in Tiki14. However, both notification systems have coexisted untill Tiki18, at least, due to the unique strengths (and weaknesses) of each one of them. See a comparison

# 1.1. Enable the feature

Enable the feature in "Admin home > Community"

← → C D localhost/trunk tik	i-admin.php?page=community 2: Asana 🔇 Contactually 🛅 LinkedIn 🛃	cki/oki
Search	Q User Protepted ( Vy Bookmarks ( User Contacts ( Notifications ( Notifications ( Notification count refresh interval:	A Account -
	Notification Digests	0 to disable, every refresh causes a hit on the server, try to leave this above 60 seconds.
	Sample command:	u will need to set-up a cron job. xur digest frequency. Default frequency is 7 days. r/Documents/trunk/console.php localhost 7path=/trunk/
	<ul> <li>User Watches Translations @</li> <li>User Watches @ Image: Second Sec</li></ul>	

Click to expand

# 1.2. Notice the changes in the interface

Once the notification is set up, when the page is changed, the notification counter is updated in the top bar.

Once activated, the eye icon above objects provide a single interface to manage all notifications related to the current object, including categories, structures, translations and other object regroupements.

Click to expand

The notifications allow the users to select the priority of a notification to them, potentially reducing the amount of email noise generated by monitoring too many pages or forum posts.

### 1.4. View notifications

Notifications use the activity stream feature to preserve notifications that were triggered for users. These can be viewed on the website itself or sent as a periodic digest.

# 1.5. Digests

Notifications can be viewed on the website itself or sent as a periodic digest.

1.5.1. Enable the notification digest

You can enable the feature notification digests:

	-admin.php?page=community E1 Asana 🙆 Contactually 🛅 LinkedIn 🛃	ck/rik				
Search	Q User Contacts Ø Notifications Ø Cear individual notifications Notification count refresh interval:	Account -      Seconds     O to deable, every refresh causes a hit on the server, try to leave this above     do accouds.				
Notification Digests     For the digest emails to be sent out, you will need to set-up a cron job.     Adjust the command parameters for your digest frequency. Default frequency is 7 days.     Sample command:     /usr/bin/php /Library/WebServer/Documents/trunk/console.php localhost 7path=/trunk/						
	User Watches Translations  User Watches  Group Watches					
	Group watches      Group Reports for User Watches      Group Liser Watches      Group Reports for User Watches      Group Reports      Group					

Click to expand

This way, you can later on set to "High" the choice in the drop down at the user notifications of tiki objects. This way they will get added to the next periodic digest.
