

## Plugin Add to Cart

Use this [wiki plugin](#), introduced in [Tiki5](#), to display a button for adding one or more items to the shopping cart. The shopping cart is displayed and accessed using [Module Cart](#). Once the order is placed in the shopping cart, the user is taken to [Payment](#).

### Parameters

Add a product to the shopping cart.

*Introduced in Tiki 5. Required parameters are in **bold**.*

[Go to the source code](#)

*Preferences required:* wikiplugin\_addtocart, payment\_feature

| Parameters          | Accepted Values | Description                                                                                                                                   | Default     | Since |
|---------------------|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------|-------------|-------|
| <b>description</b>  | text            | Label for the product in the cart.                                                                                                            |             | 5.0   |
| <b>price</b>        | text            | The price to charge for the item.                                                                                                             |             | 5.0   |
| <b>code</b>         | text            | Unique identifier for the product. Two products with the same code will be the same and the information used will be the one of the first in. |             | 5.0   |
| exchangeorderamount | int             | Should normally be set to the amount of products in the order being exchanged                                                                 | 1           | 7.0   |
| eventcode           | text            | Unique identifier for the event that is associated to the product.                                                                            |             | 7.0   |
| autocheckout        | text            | Automatically check out for purchase and send the user to pay (this is disabled when there is already something in the cart)                  | n           | 7.0   |
| bundleclass         | text            | The class the bundle belongs to                                                                                                               |             | 7.0   |
| label               | text            | Text for the submit button. default: "Add to cart"                                                                                            | Add to cart | 6.0   |
| onbehalf            | text            | Allows the selection of user to make purchase on behalf of                                                                                    | n           | 7     |
| forwardafterfree    | url             | Forward to this URL after free purchase                                                                                                       |             | 7.0   |
| href                | url             | URL of the product's information. The URL may be relative or absolute (begin with <a href="#">http://</a> ).                                  |             | 5.0   |
| productbundle       | text            | The bundle the product belongs to. Will automatically add other products in the same class to the cart                                        |             | 7.0   |

|                      |                   |                                                                                                                                    |     |      |
|----------------------|-------------------|------------------------------------------------------------------------------------------------------------------------------------|-----|------|
| productclass         | text              | The class the product belongs to                                                                                                   |     | 7.0  |
| exchangetopproductid | int               |                                                                                                                                    | 5.0 |      |
| producttype          | text              | The product type that is being sold, which will affect fulfillment, for example, standard product, event ticket                    |     | 7.0  |

| weight               | text              | The weight of the item.                                                                                                            |     | 12.1 |
| ajaxaddtocart        | (blank)<br>y<br>n | Attempts to turn on Ajax for the cart                                                                                              | n   | 7.0  |
| hidequantity         | n<br>y            | Hide the quantity field so you can create buy now button for a single item, quantity = 1 (not available with the exchange feature) | n   | 17.0 |
| exchangeorderitemid  | int               | Used in conjunction with exchange feature                                                                                          |     | 7.0  |

## Example

This code,

```
{addtocart description="Panama Hat" code="A150" price="45.00"}
```

Would produce:

The add to cart button would typically be used along with item information like below:

(screenshot)

Panama Hat

\$45.00%%%
