

## Plugin Draw

New in [Tiki8](#) (and backported to 7.1).

Embed a drawing in a wiki page. See [Draw](#) for more information.

### Parameters

Embed a drawing in a page

Introduced in Tiki 7.1.

[Go to the source code](#)

Preferences required: feature\_draw, wikiplugin\_draw

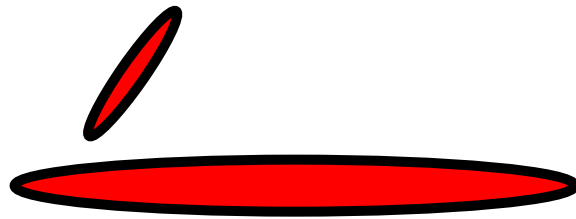

| Parameters           | Accepted Values                                                                      | Description                                                                                                                                                     | Default      | Since |
|----------------------|--------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-------|
| <code>archive</code> | (blank)<br>y<br>n                                                                    | The latest revision of file is automatically shown, by setting archive to Yes (y), it bypasses this check and shows the archive rather than the latest revision | n            | 8.0   |
| <code>height</code>  | Number of pixels followed by 'px' or percent followed by % (e.g. "200px" or "100%"). | Height in pixels or percentage. Default value is complete drawing height.                                                                                       | Image height | 7.1   |
| <code>width</code>   | Number of pixels followed by 'px' or percent followed by % (e.g. "200px" or "100%"). | Width in pixels or percentage. Default value is page width, for example, <code>200px</code> or <code>100%</code>                                                | Image width  | 7.1   |
| <code>id</code>      | ID number                                                                            | Internal ID of the file ID                                                                                                                                      |              | 7.1   |

### Example

This code:

```
{draw id="910"}
```

Would produce:
