

Plugin Font

Use this [wiki plugin](#), introduced in [Tiki8](#), to format the font type and size of text.

Parameters

Introduced in *Tiki 8*.

[Go to the source code](#)

Preferences required: `wikiplugin_font`

Parameters	Accepted Values	Description	Default	Since
(body of plugin)		Content		
<code>size</code>	text	The size of the font. This can be pixels, percentage or any other specification that is supported by the HTML/CSS standard. See here for details. The "px" suffix can be omitted. For instance, use <code>size=15</code> or <code>size=15px</code> for a font size of 15 pixels.		8.0
<code>family</code>	(blank) sans serif serif monospace Arial Century Gothic Comic Sans MS Courier New Tahoma Times New Roman Verdana	Select the font family to display the content.		8.0

Example

This code:

```
{FONT(family="Comic Sans MS" size="20")}This text is shown in Comic Sans MS font and the size is 20{FONT}
```

Would produce:

This text is shown in Comic Sans MS font and the size is 20
