

# Plugin PrefDoc

This [wiki plugin](#) generates and displays preference documentation for use on doc.tiki.org website.

- This will automatically record and keep past preference versions.
- It automatically re-caches the current tiki preferences every time the version number increases (like from 17.0 to 17.1)
- You may force a re-cache by emptying all caches (will only re-load current version)
- If description, hint or help (link) are added to a new version of tiki, it populates past versions that are missing that information
- Images specified for past version of tiki be used for up to 5 newer versions if no other images exist
- Preference data is stored as it is in tiki to allow for maximum expansion in the future with backwards compatibility (like if color coding for basic-advanced-experimental was to be implemented etc.)
- Plugin visual appearance is independent from storage, allowing for dramatic future style changes.
- If an invalid, or non-existent tab-name is given, a list of available options will be presented.

## Table of contents

- [Plugin PrefDoc](#)
  - [Parameters](#)
  - [Example](#)
    - [Generate list of available preferences to display](#)
    - [Display Look and Feel: General Layout, with images](#)

## Parameters

*Introduced in Tiki 17.*

[Go to the source code](#)

*Preferences required:* `wikiplugin_prefdoc`

Parameters	Accepted Values	Description	Default	Since
<code>img</code>	text	Show images at the top of each version of Tiki. Format: TikiVersion:FileGalleryID. Multiple images my be separated like so: TikiVersion1:FileGalleryID1 TikiVersion2:FileGalleryID2.		17
<code>tab</code>	text	The name of the preference tab to display, or a list of available tabs upon invalid.		17

## Example

### Generate list of available preferences to display

*This code:*

```
{PREFDOC()/}
```

# Display Look and Feel: General Layout, with images

There are 2 images specified. Tiki 17 image has a file gallery id of 33 and the Tiki 14 image has a file gallery id of 12. *This code:*

```
{PREFD0C(tab="look-generallayout" img="17:33|14:12")/}
```

File is not an image.

Option	Description	Default
Site logo and title	Display a site logo image and/or title in the page header area. <b>⚠</b> <i>This setting is expected to be moved from here to the admin-modules page.</i>	Enabled
Logo source (image path)	This can be a conventional path to the image file, or the syntax to display an image in a Tiki gallery.	img/tiki/Tiki_WCG.png
Site icon	This is used in narrow (top to bottom) page headers. In some layouts, the image is scaled down to fit in the available space. <i>Recommended image height: 32 pixel</i>	img/tiki/tikilogo_icon.png
Logo background color	A legacy option to add a background color to the div that contains the logo image. <i>Examples: 1) silver - 2) #fff</i>	Transparent
Logo title (on mouseover)	This appears as tool tip text. The site logo is also a link to the site index (top page).	Tiki powered site
HTML "alt" tag description	Normally a description of the image, such as <code>\\"Example.com logo\\"</code> . <i>Used by text browsers, screen readers, etc.</i>	Site Logo
Site title	The displayed title of the website.	None
Subtitle	A short phrase that, for example, describes the site.	None
<b>Top module zone</b>	Visibility of horizontal zone for modules such as site logo, log-in form, etc. (page header) <b>☰</b> Only if one or more modules are assigned   Always   Never	Only if one or more modules...
<b>Topbar module zone</b>	Visibility of horizontal zone for modules such as menu (navbar), search form, full-width content, etc. <b>☰</b> Only if one or more modules are assigned   Always   Never	Only if one or more modules...

Option	Description	Default
Page top module zone	Visibility of horizontal zone above main page area for modules such as breadcrumbs, banners, share icons, etc ☰ Only if one or more modules are assigned   Always   Never	Only if one or more modules...
Left column	<i>Controls visibility of the left column of modules</i> ☰ Only if one or more modules are assigned   Always   User decides   Never	Only if one or more modules...
Right column	<i>Controls visibility of the right column of modules</i> ☰ Only if one or more modules are assigned   Always   User decides   Never	Only if one or more modules...
Page bottom module zone	Visibility of horizontal zone below the main page area for modules such as banners or other information ☰ Only if one or more modules are assigned   Always   Never	Only if one or more modules...
Bottom module zone	Visibility of horizontal zone for modules such as "powered by" and "rss list" (page footer) ☰ Only if one or more modules are assigned   Always   Never	Only if one or more modules...
Module file	Use a static module definition file instead of relying on the dynamic values generated by Tiki. Useful for custom themes. The file must be in YAML format, following the format used in profiles.	None
Extra module zones available	Extra module zones to be managed through the module administration interface. Useful if a custom theme or layout requires a special zone other than the predefined ones. <i>Comma-separated list, maximum of 20 characters per entry.</i>	None
Webmaster report	Activate the feature to report a problematic page to the webmaster..	Disabled
Webmaster email	A specific email address can be set for receiving the webmaster reports. <i>Leave blank to use the default sender email</i>	None
Email this page	This enables users to share a page with others, by emailing a short message and link to the page. <i>Adds a link at the bottom if set, otherwise adds a link at the top</i>	Disabled
