

## Plugin Snarf

Use this [wiki plugin](#) to include the body (HTML) text at the URL given in the `url` argument. It is similar to [Integrator](#).

### Parameters

Introduced in Tiki 1. Required parameters are in **bold**.

[Go to the source code](#)

Preferences required: `wikiplugin_snarf`

Parameters	Accepted Values	Description	Default	Since
<code>url</code>	url	Full URL to the page to include.		1
<code>cache</code>	int	Cache time in minutes. Default is to use site preference, Set to 0 for no cache.		5.0
<code>colors</code>	text	Syntax highlighting to use for code snippets (Plugin Code is used for this)		3.0
<code>ajax</code>	text	Text to click on to fetch the URL via Ajax		6.0
<code>regex</code>	text	PCRE-compliant regular expression pattern to find the parts you want changed		1
<code>regexres</code>	text	PCRE-compliant regular expression replacement syntax showing what the content should be changed to		1
<code>ishtml</code>	(blank) 1 0	Set to Yes ( <input type="checkbox"/> ) to display the content as is instead of escaping HTML special characters (not set by default).		3.0
<code>ln</code>	(blank) 1 0	Set to Yes ( <input type="checkbox"/> ) to add line numbers to code snippets (not shown by default)		3.0
<code>rtl</code>	(blank) 1 0	Switch the text display from left to right to right to left		3.0
<code>wiki</code>	(blank) 1 0	Parse wiki syntax within the code snippet (not parsed by default).	0	3.0
<code>wrap</code>	(blank) 1 0	Enable/disable word wrapping of snippets of code (enabled by default)	1	3.0

Arbitrary [regex](#) replacement can be done on this content using `regex` and `regexres`, which are used as the first and second arguments to `preg_replace` PHP function, respectively, after pulling out just the

`<body>` data.

## Examples

```
{SNARF
(url="http://www.livejournal.com/users/rlpowell/2418.html" regex="/.*<!-- Content -
->.*?<td>(.*?)</td>.*?</div>(.*?)<hr.*?<!-- \/Content -->.*\/s"
regexres="<p>$1</p>$2")}[http://www.livejournal.com/users/rlpowell/2418.html]
{SNARF}
```

To include the content of a page of another Tiki installation you can use the following syntax:

```
{snarf url="http://my.foo.bar/tiki-index_raw.php?page=ExamplePage" wrap="1" ishtml="1"
cache="20"}
```

## Include Tiki.org Footer Page

```
{snarf url="https://tiki.org/tiki-index_raw.php?page=Shared_t_o_footer&clean" ishtml=1}
```

## Produces:

(currently output is "broken" in Tiki 20.x on this site )

### Shared\_t\_o\_footer
