

Plugin Stat

Introduced in [Tiki4](#)

Use this [wiki plugin](#) to show various statistics for an object.

Parameters

Introduced in Tiki 4. Required parameters are in **bold**.

[Go to the source code](#)

Preferences required: `wikiplugin_stat`

Parameters	Accepted Values	Description	Default	Since
type	(blank) article article:trackeritem article:trackeritem:wiki article:wiki article:wiki:trackeritem trackeritem trackeritem:article trackeritem:article:wiki trackeritem:wiki trackeritem:wiki:article wiki wiki:article wiki:article:trackeritem wiki:trackeritem wiki:trackeritem:article	Colon-separated list of object type to show stats for.		4.0
parentId	digits	Enter a tracker ID to restrict stats to that tracker (for use with trackeritems only).		4.0
lastday	a or v or both separated by a colon. Example: "a:v" or "v:a"	Added and/or viewed in the last 24 hours (only added items shown for tracker items whether a (added) or v (viewed) or both is set)		4.0
lastweek	a or v or both separated by a colon. Example: "a:v" or "v:a"	Added and/or viewed in the last 7 days (only added items shown for tracker items whether a (added) or v (viewed) or both is set)		4.0
lastmonth	a or v or both separated by a colon. Example: "a:v" or "v:a"	Added and/or viewed last month (only added items shown for tracker items whether a (added) or v (viewed) or both is set)		4.0

<code>lastyear</code>	a or v or both separated by a colon. Example: "a:v" or "v:a"	Added and/or viewed in the last 365 days (only added items shown for tracker items whether <code>a</code> (added) or <code>v</code> (viewed) or both is set)	4.0
<code>month</code>	a or v or both separated by a colon. Example: "a:v" or "v:a"	Added and/or viewed since the beginning of the month (only added items shown for tracker items whether <code>a</code> (added) or <code>v</code> (viewed) or both is set)	4.0
<code>week</code>	a or v or both separated by a colon. Example: "a:v" or "v:a"	Added and/or viewed since the beginning of the week (only added items shown for tracker items whether <code>a</code> (added) or <code>v</code> (viewed) or both is set)	4.0
<code>year</code>	a or v or both separated by a colon. Example: "a:v" or "v:a"	Added and/or viewed since the beginning of the year (only added items shown for tracker items whether <code>a</code> (added) or <code>v</code> (viewed) or both is set)	4.0
<code>day</code>	a or v or both separated by a colon. Example: "a:v" or "v:a"	Added and/or viewed since the beginning of the day (only added items shown for tracker items whether <code>a</code> (added) or <code>v</code> (viewed) or both is set)	4.0

Limitation

- viewed tracker items does not work, although prior to 6.1, only "v" could be used for any of the time period parameters, although the results would show added items. Beginning with 6.1, either a or v can be used, but only added items will be shown for tracker items.

Example

This code:

```
{stat type="wiki" lastday="a:v" day="a:v" lastweek="a:v" week="a:v" lastmonth="a:v" month="a:v" lastyear="a:v" year="a:v"}
```
