Plugin Superscript
Use this wiki plugin to render characters as superscript text. It is the equivalent of using `<sup></sup>` tags in HTML.

Parameters
There are no parameters required - only the text between the `SUP` tags is needed.

Examples
Basic Example
*This code:*

```
This is regular text{SUP()}and this is superscript{SUP}
```

*Produce:*

This is regular text and this is superscript

Example with Formatted Superscript
*This code,*

```
This is regular text{SUP()}''and this is italic superscript''{SUP}
```

*Produce:*

This is regular text and this is italic superscript
