

PluginTabs

Introduced in [Tiki4](#)

Use this [wiki plugin](#) to arrange content into tabs.

Parameters

Introduced in [Tiki 4](#). Required parameters are in **bold**.

Preferences required: `wikiplugin_tabs`

Parameters	Accepted Values	Description	Default	Since
(body of plugin)		Tabs content, separated by "/////"		
tabs	text	Pipe-separated list of tab titles. Example: tab 1 tab 2 tab 3		4.0
name	text	Unique tabset name (if you want the last state to be remembered). Example: user_profile_tabs		4.0
inside_pretty	(blank) n y	Parse pretty tracker variables within tabs	n	8.0
toggle	(blank) y n	Allow toggling between tabs and no-tabs view	y	8.0

Example

This code:

```
{TABS(name="user_tabset_01" tabs="Title 1|Title 2|Title3")}This is the content of the first tab
//////
This is the content of the second tab
//////
This is the content of the third tab
{TABS}
```

Would produce:

This is the content of the first tab

This is the content of the second tab

This is the content of the third tab

When clicking on a tab name, the content of each tab is loaded and shown without refreshing the browser window.

And when clicking on the "**No Tabs**" option, the display would change into:
