This experiment was removed from Tiki
This was part of the FutureLink-Protocol experiment.
Textlink to Forwardlink

(Forward Link Protocol)

experimental feature

This page is just for information - the protocol is still "in the oven" and under development. I added this docupage just because the Forward Link Protocol was mentioned in the last webinar at 16th of Feb 2012

On a client website the Plugin Textlink feeds the forwardlink which is being provided on a master website.

Communication between a master and the clients is mad with the ForwardLinkProtocol
