

Rating Tracker Field

This is a [stub](#)

Introduced in [Tiki8](#), this is the corresponding tracker field to the feature [Rating](#) and [Advanced Rating](#).

In [Tiki12](#), at least, you have 3 modes:

- Stars
- Radio Buttons
- Single option: e.g. Like

You can also set the labels to something else different from the real values that will be stored for the calculation of average, etc.

In this example, below, the tracker field Rating was set with:

- Option: -2,-1,0,1,2
- Mode: Stars
- Labels: -2,-1,0,1,2

The screenshot displays the 'Tracker: Bugs & Wish list' interface. At the top, there are two buttons: 'Trackers' and 'View Items'. Below them is a red banner with the text: 'If this is your first time, please read: [How to Submit a new item on the Wish](#)'. The main content area has two tabs: 'Tracker Items' and 'Insert New Item'. A search bar shows 'Items found: 1552'. Below the search bar is a table with columns for 'New Rating', 'Subject', and 'Subj'. The table lists several items with their respective ratings and subjects. The second item, '(2) Together: make it work for wiki pages, spreadsheet, drawing', is highlighted. A tooltip is visible over the rating stars for this item, showing 'Number of votes: 2, Average: 1.5, Your rating: 2'. The tooltip also indicates that the user's rating is 2. The third item, '(1) Screencasts in comments: no longer showing', is also visible.
