

Rating Tracker Field

This is a [stub](#)

Introduced in [Tiki8](#), this is the corresponding tracker field to the feature [Rating](#) and [Advanced Rating](#).

In [Tiki12](#), at least, you have 3 modes:

- Stars
- Radio Buttons
- Single option: e.g. Like

You can also set the labels to something else different from the real values that will be stored for the calculation of average, etc.

In this example, below, the tracker field Rating was set with:

- Option: -2,-1,0,1,2
- Mode: Stars
- Labels: -2,-1,0,1,2

The screenshot displays the 'Tracker: Bugs & Wish list' interface. At the top, there are two red buttons: 'Trackers' and 'View Items'. Below them is a red banner with the text: 'If this is your first time, please read: [How to Submit a new item on the Wish](#)'. The main content area has two tabs: 'Tracker Items' and 'Insert New Item'. A search bar shows 'Items found: 1552'. The table below has columns for 'New Rating', 'Subject', and 'Subj'. Three items are visible:

New Rating	Subject	Subj
(1) Monitoring pre-dogfood servers	marc	
(2) Together: make it work for wiki pages, spreadsheet, drawing,	marc	
(1) Screencasts in comments: no longer showing	marc	

The second item is highlighted, and a tooltip is shown over the rating stars. The tooltip text is: 'Number of votes: 2, Average: 1.5, Your rating: 2'. Red arrows point from the tooltip to the stars and the rating value.
