Share

Introduced in Tiki6, this feature allows sending messages to Social Networks, as well as internal messages or forum posts to alert on some wiki page in your Tiki site, etc.

How to use Share

**Enable the Feature:**
Admin home > Features > Global Features > Additional > Share

Admin Share

**To access:** Click the Share icon on the Admin Panel
or access http://example.org/tiki-admin.php?page=share

Set it up in the Share admin panel:

![Share admin panel](image)

Click to expand

Once enabled the feature, all pages will have a new icon on the top right corner, to allow the user to share this page with others:

![Page icon](image)

Click to expand

Once you click there, you will be offered some options to share the page with, depending on the
associated features (internal or related to external social networks) which are already enabled and configured in your site.

Share this page

- **Subject**: A friend sends you a link from: tiki.test
- **Text**: Access rights are granted for the page.
- **Link**: http://tiki.test/tiki-index.php?page=HomePage

- **Send email**: Yes / No
- **Recipient(s)**
  - Separate multiple email addresses with a comma and a space
- **Your name**
- **Your email**
  - Share access rights
  - Receive notifications when the link is accessed

Click to expand

**Share with access rights**

This feature is useful when sharing content that is not publicly available. The recipients will inherit user's access rights for the shared resource only.

Preferences required: auth_token_access and auth_token_share.
