

Stub

This page is a stub of information related to the not-very-well-documented simple wiki ratings feature.

Enabling and Configuration

Set "Simple wiki ratings" under Admin Home, Wiki, Features (tiki-admin.php?page=wiki&cookietab=2)

FAQ

1. Where are the results displayed?

tiki-poll_results.php ? Seems to not list Simple Wiki Rating results.

tiki-old_polls.php ? Seems to not list Simple Wiki Rating results.

The results are tabulated in the database table **tiki_user_votings**. The site pages for which the votes are applied are in field "**id**" with **values** like "wiki2". "Wiki2" in this example, is the Rating Type, "wiki" (as opposed to "article"), and the "2" indicates the "**page_id**" from database table **tiki_pages**. Don't know yet if there is a page to display the results.

2. Why doesn't the rating bar show up on pages for users with lower permissions?

Because templates/tiki-show_page.tpl requires \$tiki_p_assign_perm_wiki_page eq 'y' . This appears to be a bug. Consider changing that to " \$tiki_p_wiki_vote_ratings eq 'y' " .

3. Can the collected votes be deleted somehow to reset the tally?

From lib/prefs/wiki.php:

```
'wiki_simple_ratings' => array(
    'name' => tra('Simple wiki ratings'),
    'description' => tra('Enable users to rate articles based on a
simple numeric scale.'),
    'type' => 'flag',
    'default' => 'n',
),
'wiki_simple_ratings_options' => array(
    'name' => tra('Wiki rating options'),
    'description' => tra('List of options available for the rating of
wiki pages.'),
    'type' => 'text',
    'separator' => ',',
    'filter' => 'int',
    'default' => range(1, 5),
),
```

From tiki-admin.php:

```
"rating" => array(
    'position' => '-300px -215px;',
    'icon' => 'img/icons/large/rating.png',
    'title' => tr('Rating'),
    'help' => 'Advanced+Rating',
    'disabled' => $prefs['wiki_simple_ratings'] !== 'y' &&
    $prefs['rating_advanced'] !== 'y' &&
    $prefs['article_user_rating'] !== 'y',
),
```

From lib/rating/ratinglib.php

References database table "tiki_user_votings".

```
function get_options( $type )
{
    $pref = 'rating_default_options';
```

```

switch( $type ) {
case 'wiki page':
    $pref = 'wiki_simple_ratings_options';
break;
case 'article':
    $pref = 'article_user_rating_options';
break;
}

global $tikilib;
return $tikilib->get_preference($pref, range(1, 5), true);
}

```

From lib/test/rating/RegisterVoteTest.php

```

function testGetWikiPageRange()
{
    global $prefs;
    $prefs['wiki_simple_ratings_options'] = range(2, 8);

    $lib = new RatingLib;
    $this->assertEquals(range(2, 8), $lib->get_options('wiki page'));
}

```

From templates/tiki-show_page.tpl

\$tiki_p_assign_perm_wiki_page appears to be a bug. Too strong. Should perhaps be \$tiki_p_wiki_vote_ratings .

```

{if $prefs.feature_wiki_ratings eq 'y'}
    {include file='poll.tpl'}
{/if}

{if $prefs.wiki_simple_ratings eq 'y' && $tiki_p_assign_perm_wiki_page eq
'y'}
    <form method="post" action="">
        {rating type="wiki page" id=$page_id}
    </form>
{/if}

```

From lib/core/Tracker/Field/Rating.php:

```
$votings = TikiDb::get()->table('tiki_user_votings');
```

From lib/polls/polllib_shared.php:

```

$query = "select user from `tiki_user_votings` where `optionId`=?";
' left join `tiki_user_votings` tuv on (tpo.`optionId` = tuv.`optionId`) ' .
$query = 'delete from `tiki_user_votings` where `id`=?';
$query = 'delete from `tiki_user_votings` where `id`=? and `optionId`=? and ' ;

```

From lib/rating/ratinglib.php:

```

$joints = array( 'tiki_user_votings' `uv` );
INNER JOIN ( SELECT ' . $connect . '(`time`) `t`, `user` `u` FROM `tiki_user_votings` WHERE ' .
implode(' AND ', $where) . ' GROUP BY `user` ' . $extra . ') `j`
'INSERT INTO `tiki_user_votings` ( `user`, `ip`, `id`, `optionId`, `time` ) VALUES( ?, ?, ?, ?, ? )',
'SELECT `optionId` FROM `tiki_user_votings` WHERE `user` = ? AND `id` = ? ORDER BY `time` DESC',

```

From lib/surveys/surveylib.php:

```
$query = 'delete from `tiki_user_votings` where `id`=?';
```

lib/test/rating/AggregationTest.php:

```
TikiDb::get()->query('DELETE FROM `tiki_user_votings` WHERE `id` LIKE ?', array('test.%'));
```

From lib/test/rating/RegisterVoteTest.php:

```
return TikiDb::get()->fetchAll('SELECT `user`, `id`, `optionId` FROM `tiki_user_votings` WHERE `id` LIKE ? ORDER BY `user`, `id`, `optionId`', array('test.%'));
```

lib/tikilib.php:

```
$query = "select count(*) from `tiki_user_votings` where `user`=? and `id`=?";
```

```
$userVotings = $this->table('tiki_user_votings');
```

```
$vote = $this->getOne("select `optionId` from `tiki_user_votings` where `user` = ? and `id` = ? order by `time` desc", array( $user, $id));
```

lib/trackers/trackerlib.php:

```
$userVotings = $this->table('tiki_user_votings');
```

...

lib/userslib.php:

```
$this->query('update `tiki_user_votings` set `user`=? where `user`=?', array($to, $from));
```

lib/wiki-plugins/wikiplugin_votings.php:

```
$votings = TikiDb::get()->table('tiki_user_votings');
```
