

The **User Tasks** feature is used to admin user tasks, which are similar to a to-do list. The Tasks screen is divided in two parts: a list of tasks and a form to enter a new task.

The list of tasks:

	title	start	end	priority	completed
<input type="checkbox"/>	>> email für Dich	03/02/2005-16:50	04/02/2005-16:50	5	50%
<input type="checkbox"/>	>> Task fertig stellen	02/02/2005-19:40		5	waiting
<input type="checkbox"/>	Taskmodul for LabWiki	01/02/2005-19:10	04/02/2005-01:00	3	90%
<input type="checkbox"/>	>< Bauteilliste	20/12/2005-02:00		3	0%
<input type="checkbox"/>	>< XC167 Toolchain documentation	17/12/2005-01:00		3	70%
<input type="checkbox"/>	<< Please emty the trash today	03/02/2005-16:50		1	waiting

6 Tasks

Find find empty trash

This list shows a user's tasks and some shared tasks.

- There are a few types of tasks:
 - private
 - >> *received task*: a task another user assigned to you
 - << *submitted task*: you assigned this task to a other user
 - >< *shared task*: this task is public to a group where you are member.

Icons

- means that this task is accepted by user and creator.
- means that only one user has accepted the task. Be aware that if you are making changes on submitted or received task it will get this state as default.
- one user has rejected this task.

States

- **waiting** / not started
- **open** / in process
- **completed** (100%)

The task list allows you to hide completed tasks with the **completed** checkbox.

Tasks can be removed by marking them as trash, and the "empty trash" button removes items. **But** if you are not the creator you can only move the task in the trash of the creator if he has the option rights by creator disabled.

From the user preferences screen the user can choose if he want to use dates for tasks. If dates are being used then tasks with a start date higher than the current date ARE not displayed in the listing or module, so future tasks are hidden. If dates are not used then all tasks are always visible. Note: when dates are in use the task listing will show links to display all tasks or tasks using dates only.

The user tasks module

normal Usertasks-module (shows own and received tasks)

public Usertask-module (shows public tasks) (this picture with activated mouse-over-feature)

A user task module is available which will show a user's tasks. The user can use it to alter the tasks.

See: [Module user_tasks](#)

Permissions

To use the features *send*, *receive* and *shared tasks*, users need to be member of a group with task permissions. A user can only send if he has the right **tiki_p_tasks_send** and the receiver has **tiki_p_tasks_receive** rights. Also, to share a task you must be in a group with the right **tiki_p_tasks_receive**, and you can share members of that group.

The permission **tiki_p_tasks_admin** allows an admin to see all shared tasks and edit them.
