

This feature was removed in Tiki21. Use [Share](#) instead.

Starting in [Tiki5](#), it's possible to share access rights to a specific URL via [Token Access](#).

This feature allows you to add a link "Email this page" in all the pages at the top of the screen. If you click on it you will see

The screenshot shows a web form titled "Send a link to a friend" in orange text. Below the title is a "Back" button. The form contains several input fields: "Link" with the value "http://disco/tiki1.10/tiki-index.php?page=tracker", "List of email addresses separated by commas" (empty), "Your name" with the value "admin", and "Your comment" (empty). At the bottom right of the form is a "send" button.

When you click a message to each of the indicated mails will be sent with your comment, the link and your name.

the feature is activated in the features admin panel  
You need a perm `tiki_p_tell_a_friend` in the tiki section
