

Text Tracker Field

This field type creates a simple text field that is not wiki-parsed.

Parameter	value	description	version
next	1 or empty	empty: next field on next row, 1: next field on same row	
size	numeric		
prepend	text	text to be displayed before the field value	
append	text	text to be displayed after the field value	
max	numeric	maximum number of characters that can be saved	
autocomplete	y or n	if y (default n) will propose an autocomplete on the values of the field (if <code>tw</code> ≥ 4.0 multilingual, will propose only the values in the associated language)	

Note:

- The text is not wiki parsed and the html is not interpreted (if you want it wiki parsed, use a textarea field)
- if you want to specify the size of the text but not to put the next field on the same line, you have to enter the parameter like

```
,50
```

or

```
0,50
```
