

Hi my name is Mike Smith and because I have a very common name I generally identify myself as "Mike Smith - [dominoconsultant.org](http://dominoconsultant.org)" (this points to my blog).

I have become involved in the TikiWiki project as an implementor and non-developer with a long-standing interest in group collaboration. I have extensive IT experience throughout my 24 year career.

You can find out more about me by looking at my LinkedIn profile at...

<http://www.linkedin.com/in/dominoconsultant>

I hope to contribute to the project and it's documentation by providing a fresh view on how the project is perceived by a new (but somewhat competent) user.

I also hope to contribute to the direction the project takes.

My 1st TikiWiki site - the Permaculture Community body of knowledge ([pcbok.org](http://pcbok.org))

- Production Site - <http://www.pcbok.org/tiki-index.php>
- Testing/Sandbox Site - [http://www.pcbok.org/testing/feb09/tiki-view\\_articles.php](http://www.pcbok.org/testing/feb09/tiki-view_articles.php)

This is a collaboration space for a moderate global environment movement. We are VERY fragmented at the moment so I hope to bring us all together into a single place that keeps people around because it has everything we need.
