Tags: A tag is a mark in the current state of the Wiki. They can be used to save the Wiki at regular intervals and to recover the whole Wiki to a particular state if something disastrous occurred. To create a tag simply enter a tag name and click the **create** tag button. To restore a tag select one of the existing tags and click **restore** (*all your Wiki pages will be lost and the saved state for the wiki will be restored!*). Since tags can take a lot of space you can remove tags that you don't want to use by clicking the **remove** tag button after selecting the tag that you don't want to use anymore.

Wiki Comments Settings

Wiki Comments Settings: This section allows you to configure the number of comments displayed per page and the default ordering of comments. The default number of comments per page is 10. The default ordering is Points. You can change these settings by clicking the 'Change settings' button.

Wiki Comments Settings: This section allows you to configure the number of comments displayed per page and the default ordering of comments. The default number of comments per page is 10. The default ordering is Points. You can change these settings by clicking the 'Change settings' button.

Field	Description
Default Number of Comments	Enter the number of comments to show at a time. If a page contains more comments, Tiki will create NEXT/PREVIOUS links. (Default = 10)

Tables syntax:	<input type="text" value="\n for rows"/>
Automonospaced text:	<input checked="" type="checkbox"/>
Uses Slideshow:	<input checked="" type="checkbox"/>

Sandbox

The Sandbox is a special page where you can test things out without affecting the main site. It's a safe place to experiment with new features, code, or content. You can create a sandbox page by adding `<div>{{Sandbox}}</div>` to the end of any page. The sandbox page will be automatically created and named `Sandbox`. You can also create a sandbox page for a specific user or group. To do this, you can use the `<div>{{Sandbox|username}}</div>` template. The sandbox page will be automatically created and named `Sandbox` followed by the username.

Last changes

The Last changes page shows a list of the most recent changes made to the site. This page is useful for keeping track of updates and for identifying any potential issues. You can view the last changes for a specific page or for the entire site. To view the last changes for a specific page, you can click on the page name in the list. To view the last changes for the entire site, you can click on the `Site` link.

Dump

The Dump page provides a way to export the content of the site to a file. This is useful for creating a backup of the site or for transferring content to another site. You can dump the content of a specific page or the entire site. To dump the content of a specific page, you can click on the page name in the list. To dump the content of the entire site, you can click on the `Site` link.
