Option	Description	Default
Add a slideshow button on wiki pages		Disabled
Backlinks	Present a list of pages that link to the current page.	Disabled
Backlink page names maximum displayed length	<i>If the text is longer, it will be truncated after that length. Special value "0" disables truncation.</i>	0 characters
Show articles	Articles linking to a wiki page are shown as backlinks.	Enabled
Show blog posts	Blog posts linking to a wiki page are shown as backlinks.	Enabled
Show calendar events	Calendar events with a description linking to a wiki page are shown as backlinks..	Enabled
Show comments	Comments linking to a wiki page are shown as backlinks.	Enabled
Show forum posts	Forum posts linking to a wiki page are shown as backlinks.	Enabled
Show tracker items	Tracker items linking to a wiki page are shown as backlinks.	Enabled
Show trackers	Trackers with a description linking to a wiki page are shown as backlinks.	Disabled
Show tracker fields	Tracker fields with a description linking to a wiki page are shown as backlinks.	Disabled
Discuss pages on forums	Enabling the option will add, on each wiki page, a Discuss button that links to a forum thread dedicated to discussion of the particular page.	Disabled
Forum for discussion		None

Option	Description	Default
Visibility of discussion	Just a button among others (default), or special section ☰ In the button bar (default) Special section above button bar	In the button bar (default)
Export	Users can export individual pages and structure pages content as a file (requires tiki_p_admin_wiki permission).	Disabled
Geolocate wiki pages	Provide controls to indicate a geographic location of wiki pages in the edit form.	Disabled
History	Users (with permission) can see the history of each wiki page.	Enabled
Maximum number of versions:	<i>0 for unlimited</i>	0 versions
Keep versions for	Do not delete versions younger than this number of days.	1 days
View page contributions by author	Visualize the contributions that different authors have made to a wiki page	Disabled
Display IP address		Disabled
Default diff style	☰ Only with last version HTML diff Side-by-side diff Side-by-side diff by characters Inline diff Inline diff by characters Full side-by-side diff Full side-by-side diff by characters Full inline diff Full inline diff by characters Unified diff Side-by-side view	Side-by-side diff
Wiki full history	Record all versions, rather than only when page content or description changes or when an edit comment is given	Disabled
Import HTML	Enable import of HTML pages. 🗑️	Disabled
Import pages		Disabled
Keywords	Allow management of keywords on a per-page basis.	Disabled
Page creators are administrators of their pages		Disabled
Mindmap	Display in a graphical way the connection among wiki pages.	Disabled
Rankings	Users can see several charts or rankings about the page.	Disabled

Option	Description	Default
Rating	Enables adding a poll from the polls feature to a wiki page. The poll is unique to the page, created from a “poll template” which is created in the Polls feature: set a poll’s ‘active’ drop-down to “template”. <i>Permissions involved: group permissions, wiki_vote_ratings, wiki_view_ratings, ratings_view_results</i>	Disabled
Sandbox	A special page to test the wiki feature that can edited, but the content is not saved.	Disabled
Date Field	The field indexed as the global "date" field <i>You will need to rebuild the search index after changing this</i> ☰ Created Last Modified	Created
Use date parameter	Allow wiki page version to be selected from a parameter "date" on the url.	Disabled
Report it in wiki links	Add the date parameter to wiki links.	Disabled
User's information page	A personal wiki page for each user.	Disabled
Userpage prefix	All userpages share a common prefix. The page name will be a concatenation of the prefix and the username. A prefix is required.	User:
Users can lock pages	Enable users to lock pages and so prevent others from editing them	Disabled
View source	Users (with permission) can see the wiki and/or HTML syntax of the page.	Enabled
Wiki copyright	Apply copyright management preferences to this feature.	Disabled
Wiki page pagination	Enable the separation of a wiki page's content into a set of two or more paginated pages.	Disabled
Wiki page separator	The separator to use in wiki page content to mark the end of each page section	...page...
Wiki references	Permits using references and the reference library.	Disabled
Library references	Enforce library reference as master	Disabled
Display reference in a popover	Display the details of the reference in a popover	Disabled
Reference style	Default style when using references ☰ AMA citation style (default) MLA citation style	AMA citation style (default)

Option	Description	Default
Simple wiki ratings	Enable users to rate wiki pages based on a simple numeric scale. 🚧	Disabled
Wiki rating options	List of options available for the rating of wiki pages	0,1,2,3,4,5
Redirect to similar wiki page	If a requested page doesn't exist, redirect to a similarly named page	Disabled
Redirect pages using these prefix-alias semantic links	Comma-separated list of page name prefixes for pages that will be redirected to other pages with a semantic link	None
Semantic links	Going beyond Backlinks functionality, this allows some semantic relationships to be defined between wiki pages.	Disabled
Similar pages	Display a list of pages named similarly to the current page.	Disabled
Similar pages only listed in same language	When listing similar pages, such as on a "page not found" page, only display pages in the same language as the request page.	Disabled
Redirect to page alias, if any	If a requested page doesn't exist, redirect to an alias page, if specified using an alias semantic link	Enabled
Semantic link types to use as page alias markers	Comma-separated list of semantic links to identify a page as an alias of another	Alias
WikiWords	Automatically convert "CamelCase" words into wiki links.	Disabled
Accept dashes and underscores in WikiWords		Enabled
Link plural WikiWords to their singular forms		Enabled
Use file galleries for wiki attachments	Wiki attachments will be stored in the file gallery. 🚧	Disabled
Attachments	Allow users to upload (attach) files to a page.	Disabled
Display by default		Disabled
Storage	☰ Store in database Store in directory	Store in database
Path (if stored in directory)		None
Images	Allow users to upload images to a page.	Enabled

Option	Description	Default
Use file galleries to store images	If not enabled, images will be stored in the file system, in the /img/wiki_up directory, instead.	Enabled
Comments below wiki pages	Users with permission may post threaded comments. The comments will appear at the bottom of the page.	Disabled
Allow comments per wiki page	Enable control of comments on wiki pages on a per-page basis. ☰ Disable Enable (default On) Enable (default Off)	Disable
Display comment list by default		Disabled
Display order	☰ Newest first Oldest first Points	Points
Display Post new comment form by default		Disabled
Enable watches on comments		Enabled
Number per page		10 comments
Structures	Structures allow grouping any number of wiki pages in a hierarchy, with a common navigation bar and the option to print them all together as a single HTML document.	Disabled
Structure navigation bar location	Display Next and Back buttons, breadcrumbs, and a form to add a new page. ☰ Top Bottom Both Neither	Top
Open page as structure	Open a page within its structure (with structure navigation, etc.), even if no structure parameter is given in the URL	Disabled
Make structure from page	Show a button below each wiki page to allow converting it from a simple wiki page into the root page of a new structure	Disabled
Categorize structure pages together	Place new pages of a structure in the same category as the structure's root page	Disabled
Structures drill down menu	Ajax-style menu in which the user moves through the page hierarchy by clicking to reveal the next level down	Disabled
Lock Wiki Structures	Enable users to lock wiki structures and so prevent others from editing them	Disabled

Option	Description	Default
Create webhelp from structure	If enabled, the Structure Admin page will include a new option for generating WebHelp (a self-contained, HTML "help" version of the wikii structure). Use this option to distribute wiki pages to offline users in a usable format.	Disabled
Pages can reoccur in structure	A page can be listed multiple times in a structure	Disabled
Pages not in structure	Users (with permission) can see the sortable, searchable list of wiki pages (tiki-listpages.php). Use the Configuration area to specify which items to display.	Disabled
Disable inherited direct object permissions	Normally pages will inherit object permissions from their parent page. However, object permissions override category permissions. So, if you are relying on category permissions in structures, you may want to consider this setting, in order to disable inheritance of direct object permissions when adding pages from a structure	Disabled
Plugin Table of Contents (Structure)	Display a table of contents of pages in a structure	Enabled
Create watch for author on page creation		Disabled
Enable watch events when you are the editor		Disabled
Watch minor edits		Disabled
Namespace	Enable namespaces feature for wiki pages. 	Disabled
Namespace separator	Select the character, symbol, or text to use as the namespace separator.	:_:
Hide namespace indicator in structure path	Hide namespace indicator in structure path.	Disabled
Hide namespace indicator in page title	Hide namespace indicator in page title.	Disabled
Center text using ::: instead of ::	<i>Useful to avoid conflicts with C++ scope operators or default namespace separator</i>	Disabled
Page name display stripper	The character(s) to use as a delimiter in the page name. The portion of the name after the character(s) will not be displayed. If the page name display stripper conflicts with the namespace separator, the namespace is used and the page name display is not stripped.	None

Option	Description	Default
Force all non-namespace page links to the same namespace	If the current page is in a namespace, all links without a namespace will have it added automatically	Disabled

Option	Description	Default
Add a slideshow button on wiki pages		Disabled
Backlinks	Present a list of pages that link to the current page.	Disabled
Backlink page names maximum displayed length	<i>If the text is longer, it will be truncated after that length. Special value "0" disables truncation.</i>	0 characters
Show articles	Articles linking to a wiki page are shown as backlinks.	Enabled
Show blog posts	Blog posts linking to a wiki page are shown as backlinks.	Enabled
Show calendar events	Calendar events with a description linking to a wiki page are shown as backlinks..	Enabled
Show comments	Comments linking to a wiki page are shown as backlinks.	Enabled
Show forum posts	Forum posts linking to a wiki page are shown as backlinks.	Enabled
Show tracker items	Tracker items linking to a wiki page are shown as backlinks.	Enabled
Show trackers	Trackers with a description linking to a wiki page are shown as backlinks.	Disabled
Show tracker fields	Tracker fields with a description linking to a wiki page are shown as backlinks.	Disabled
Discuss pages on forums	Enabling the option will add, on each wiki page, a Discuss button that links to a forum thread dedicated to discussion of the particular page.	Disabled
Forum for discussion		None
Visibility of discussion	Just a button among others (default), or special section  In the button bar (default) Special section above button bar	In the button bar (default)
Export	Users can export individual pages and structure pages content as a file (requires tiki_p_admin_wiki permission).	Disabled

Option	Description	Default
Geolocate wiki pages	Provide controls to indicate a geographic location of wiki pages in the edit form.	Disabled
History	Users (with permission) can see the history of each wiki page.	Enabled
Maximum number of versions:	<i>0 for unlimited</i>	0 versions
Keep versions for	Do not delete versions younger than this number of days.	1 days
View page contributions by author	Visualize the contributions that different authors have made to a wiki page	Disabled
Display IP address		Disabled
Default diff style	☰ Only with last version HTML diff Side-by-side diff Side-by-side diff by characters Inline diff Inline diff by characters Full side-by-side diff Full side-by-side diff by characters Full inline diff Full inline diff by characters Unified diff Side-by-side view	Side-by-side diff
Wiki full history	Record all versions, rather than only when page content or description changes or when an edit comment is given	Disabled
Import HTML	Enable import of HTML pages. 🏠	Disabled
Import pages		Disabled
Keywords	Allow management of keywords on a per-page basis.	Disabled
Page creators are administrators of their pages		Disabled
Mindmap	Display in a graphical way the connection among wiki pages.	Disabled
Rankings	Users can see several charts or rankings about the page.	Disabled
Rating	Enables adding a poll from the polls feature to a wiki page. The poll is unique to the page, created from a “poll template” which is created in the Polls feature: set a poll’s ‘active’ drop-down to “template”. <i>Permissions involved: group permissions, wiki_vote_ratings, wiki_view_ratings, ratings_view_results</i>	Disabled

Wiki rating options	List of options available for the rating of wiki pages	0,1,2,3,4,5
Redirect to similar wiki page	If a requested page doesn't exist, redirect to a similarly named page	Disabled
Redirect pages using these prefix-alias semantic links	Comma-separated list of page name prefixes for pages that will be redirected to other pages with a semantic link	None
Semantic links	Going beyond Backlinks functionality, this allows some semantic relationships to be defined between wiki pages.	Disabled
Similar pages	Display a list of pages named similarly to the current page.	Disabled
Similar pages only listed in same language	When listing similar pages, such as on a "page not found" page, only display pages in the same language as the request page.	Disabled
Redirect to page alias, if any	If a requested page doesn't exist, redirect to an alias page, if specified using an alias semantic link	Enabled
Semantic link types to use as page alias markers	Comma-separated list of semantic links to identify a page as an alias of another	Alias
WikiWords	Automatically convert \"CamelCase\" words into wiki links.	Disabled
Accept dashes and underscores in WikiWords		Enabled

Option	Description	Default
Link plural WikiWords to their singular forms		Enabled
Attachments	Allow users to upload (attach) files to a page.	Disabled
Display by default		Disabled
Storage	☰ Store in database Store in directory	Store in database
Path (if stored in directory)		None
Images	Allow users to upload images to a page.	Enabled
Use file galleries to store images	If not enabled, images will be stored in the file system, in the /img/wiki_up directory, instead.	Enabled
Comments below wiki pages	Users with permission may post threaded comments. The comments will appear at the bottom of the page.	Disabled
Allow comments per wiki page	Enable control of comments on wiki pages on a per-page basis. ☰ Disable Enable (default On) Enable (default Off)	Disable
Display comment list by default		Disabled
Display order	☰ Newest first Oldest first Points	Points
Display Post new comment form by default		Disabled
Enable watches on comments		Enabled
Number per page		10 comments
Structures	Structures allow grouping any number of wiki pages in a hierarchy, with a common navigation bar and the option to print them all together as a single HTML document.	Disabled
Structure navigation bar location	Display Next and Back buttons, breadcrumbs, and a form to add a new page. ☰ Top Bottom Both Neither	Top
Open page as structure	Open a page within its structure (with structure navigation, etc.), even if no structure parameter is given in the URL	Disabled

Option	Description	Default
Make structure from page	Show a button below each wiki page to allow converting it from a simple wiki page into the root page of a new structure	Disabled
Categorize structure pages together	Place new pages of a structure in the same category as the structure's root page	Disabled
Structures drill down menu	Ajax-style menu in which the user moves through the page hierarchy by clicking to reveal the next level down	Disabled
Lock Wiki Structures	Enable users to lock wiki structures and so prevent others from editing them	Disabled
Create webhelp from structure	If enabled, the Structure Admin page will include a new option for generating WebHelp (a self-contained, HTML "help" version of the wikii structure). Use this option to distribute wiki pages to offline users in a usable format.	Disabled
Pages can reoccur in structure	A page can be listed multiple times in a structure	Disabled
Pages not in structure	Users (with permission) can see the sortable, searchable list of wiki pages (tiki-listpages.php). Use the Configuration area to specify which items to display.	Disabled
Disable inherited direct object permissions	Normally pages will inherit object permissions from their parent page. However, object permissions override category permissions. So, if you are relying on category permissions in structures, you may want to consider this setting, in order to disable inheritance of direct object permissions when adding pages from a structure	Disabled
Plugin Table of Contents (Structure)	Display a table of contents of pages in a structure	Enabled
Create watch for author on page creation		Disabled
Enable watch events when you are the editor		Disabled
Watch minor edits		Disabled
Namespace	Enable namespaces feature for wiki pages. 	Disabled
Namespace separator	Select the character, symbol, or text to use as the namespace separator.	:_:

Option	Description	Default
Hide namespace indicator in structure path	Hide namespace indicator in structure path.	Disabled
Hide namespace indicator in page title	Hide namespace indicator in page title.	Disabled
Center text using ::: instead of ::	Useful to avoid conflicts with C++ scope operators or default namespace separator. <i>Useful to avoid conflicts with C++ scope operators or default namespace separator</i>	Disabled
Page name display stripper	The character(s) to use as a delimiter in the page name. The portion of the name after the character(s) will not be displayed. If the page name display stripper conflicts with the namespace separator, the namespace is used and the page name display is not stripped.	None
Force all non-namespace page links to the same namespace	If the current page is in a namespace, all links without a namespace will have it added automatically	Disabled

Option	Description	Default
Add a slideshow button on wiki pages		Disabled
Backlinks	Present a list of pages that link to the current page.	Disabled
Backlink page names maximum displayed length	<i>If the text is longer, it will be truncated after that length. Special value "0" disables truncation.</i>	0 characters
Show articles	Articles linking to a wiki page are shown as backlinks.	Enabled
Show blog posts	Blog posts linking to a wiki page are shown as backlinks.	Enabled
Show calendar events	Calendar events with a description linking to a wiki page are shown as backlinks..	Enabled
Show comments	Comments linking to a wiki page are shown as backlinks.	Enabled
Show forum posts	Forum posts linking to a wiki page are shown as backlinks.	Enabled

Keep versions for	Never delete versions younger than (? days), default=1 days	1
Display IP address		Disabled
Default diff style	 Only with last version HTML diff Side-by-side diff Side-by-side diff by characters Inline diff Inline diff by characters Full side-by-side diff Full side-by-side diff by characters Full inline diff Full inline diff by characters Unified diff Side-by-side view	Side-by-side diff
Wiki full history	Record all versions, rather than only when page content or description changes or when an edit comment is given	Disabled

Option	Description	Default
View page contributions by author	Visualize the contributions of different authors made to a wiki page	Disabled
Discuss pages on forums	Include a link on each page to a forum topic.	Disabled
Forum for discussion		None
View source	enable viewing the source of Wiki pages	Enabled
Rating	This allows you to add a poll from polls feature to any wiki page. The poll is unique to the page, created from a "poll template" which is created in the Polls feature: set a poll's 'active' drop-down to "template". <i>Permissions involved: group permissions, wiki_vote_ratings, wiki_view_ratings, ratings_view_results</i>	Disabled
Simple wiki ratings	Enable users to rate articles based on a simple numeric scale.	Disabled
Wiki rating options	List of options available for the rating of wiki pages.	0,1,2,3,4,5
Backlinks	Allows users to view a list of pages, called backlinks, that link to the current page.	Disabled
Name length	Maximum length (characters) to display/truncate for backlink page names. Use "0" for no truncation. <i>If the text is longer, it will be truncated after that length. Special value "0" disables truncation.</i>	0
Semantic links	Going beyond Backlinks, allows some semantic relationships to be defined between wiki pages	Disabled
Redirect pages using these prefix alias semantic links	Comma separated list of prefixes of which pages will be redirected to page with semantic link	None
Similar (like pages)	Users can see a listing of pages named similarly to the current page.	Disabled
Similar pages only listed in same language	When listing similar pages, such as in missing page 404, only display pages in the same language as the request.	Disabled
Redirect to similar wiki page	If a requested page doesn't exist, redirect to a similarly named page	Disabled
Redirect to page alias, if any	If a requested page doesn't exist, redirect to an alias page, if specified using an alias semantic link	Enabled
Semantic link types to use as page alias markers	Comma separated list of semantic links to use to identify a page as an alias to another	Alias

Option	Description	Default
Rankings	Users can see several charts or rankings about the page.	Disabled
Structures	Structures allow grouping many wiki pages with hierarchy, a common navigation bar and the option to print them all together as a single html	Disabled
Open page as structure	Opens the structure heading for structure pages, even if no structure parameter is given in the URL	Disabled
Make structure from page	Show a button below each wiki page to allow converting it from a simple wiki page into the root page of a new structure	Disabled
Categorize structure pages together	Group new pages in the structure under the same category as the root page of that structure	Disabled
Create webhelp from structure	If enabled, the Structure Admin page will include a new option for generating WebHelp (an self-contained, HTML "help" version of the Wiki structure). Use this option to distribute Wiki pages to offline users in a usable format.	Disabled
Structures Drill Down Menu	Ajax style drill down menu for structures	Disabled
Pages can re-occur in structure	A page can occur multiple times in a structure	Disabled
Pages not in structure	List pages not in structure	Disabled
Disable inherited direct object permissions	Normally pages will inherit object permissions from their parent page. However, object permissions override category permissions. So, if you are relying on category permissions in structures, you may want to consider this setting, in order to disable inheritance of direct object permissions when adding pages from a structure	Disabled
Structure navigation bar location	Displays Next/Back buttons, breadcrumbs, and form to add a new page. 	Top
Plugin Table of Contents (Structure)	Display a table of contents of pages or sub-pages	Enabled
Hide namespace indicator in structure path	Hide namespace indicator in structure path.	Disabled
Import HTML	allow import of HTML pages	Disabled
Import pages		Disabled

Option	Description	Default
Use date parameter	Allow wiki page version to be selected from a parameter "date" on the url.	Disabled
Report it in wiki links	Add the date parameter to wiki links.	Disabled
Add a slideshow button on wiki pages		Disabled
User's page	A personal page for the user to manage.	Disabled
