

Using Square Brackets

If you wish to include square brackets in your text (i.e. as regular text and not a link) simply add an additional open bracket to start. E.g.

[[this would not be a link]

Would render like this...

[this would not be a link]

Non-breaking space

Use ~hs~~ to add the HTML " " for a non-breaking space.

Entering code

You enter code blocks by enclosing the block between `CODE()` and `CODE` tags (you need to put curly braces around the tags). Note this is a smarty construct, not a Wiki syntax.
