

## Module Search

New to [Tiki6](#), this merges

- Search text (of all the site)
- Search title of wiki page
- Edit page

Editing the look of the Search Module:

To remove the Titles button from the module -

1. Go to Admin Modules (`tiki-admin_modules.php`) and add the module to your site.
2. The module config page will open.
3. Enter "n" in "Show Go Button" (looks like this became the Titles button).
4. Save.

- I also changed the name of the module to "Action" and the text of the search button to "Search". (Sorry, the tooltip disappears when you edit the module.) This leaves a Search button and an Edit button, to edit/create pages.
