## Funktionen

Tiki ist eines der funktionsreichsten CMS-Programme weltweit. Tatsächlich ist es - soweit uns bekannt - die Open Source Anwendung mit den **meisten von Haus aus eingebauten Funktionen** überhaupt. Sollte das nicht richtig sein, so sind Sie eingeladen, diese Seite zu ändern 😊.

Im Gegensatz zu anderen Open Source Projekten, die nur wenige Funktionen mitbringen, und dadurch die Benutzer dazu animieren Funktionen von Drittanbieters zu installieren, bringt Tiki eine grosse Anzahl von Funktionen von Haus aus mit. Damit wird sichergestellt, dass bei Updates alle Funktionen auch weiterhin nutzbar bleiben. Ausserdem erlaubt dies, Funktionen stark zu integrieren und Inhalte in verschiedenen Funktionen ohne Einschränkungen zu nutzen. Z.B.: kann man den [Wiki Syntax](#) in allen Funktionen von Tiki benutzen, d.h. in Wiki Seiten, Foreneinträgen, Trackern, u.a. Erfahren Sie mehr über das Tiki [Model](#).

Tiki befindet sich in einem Zustand, in dem es durch die Tiki Gemeinde andauernd weiter entwickelt wird, so dass manche Funktionen noch nicht vollständig fertig entwickelt sind. Diese Seite bietet ein Bewertungssystem für jede einzelne Funktion an, um sich ein Bild davon zu machen, ob Tiki für Sie die richtige Wahl ist.

Die Bewertungen sind für die [letzte stabile Version](#). Die nächste grössere Version wird weitere Verbesserungen der u.a. Funktionen und auch neue Funktionen bringen.

### Bewertungssystem

**A:** Ausgezeichnet - **B:** Sehr gut - **C:** gut - **D:** schlecht - **E:** sehr schlecht

### Subjektive Eigenbewertung durch die Tiki Gemeinde

- Setup/admin UI: Wie einfach / intuitiv ist es, diese Funktion zu konfigurieren?
- UI end user : Wenn die Funktionen konfiguriert ist, wie einfach / intuitiv ist die Benutzung für den Enduser? (war es die Arbeit wert?)
- Stability: Wie viele Bugs gibt es noch?
- Feature-set / power: Wie gut ist diese Funktion im Vergleich zu anderen Open Source Anwendungen? *Nach dieser Spalte erfolgt standarmäßig die Sortierung*

Allgemeine Hinweise

Über die jeweiligen Tiki Funktionen

Weil Tiki bereits von Hause aus eine so grosse Anzahl von Funktionen bietet, kann dies selbst für einen

erfahrenen Benutzer oder gar Administrator überwältigend sein. Tiki hat neben den klassischen CMS- und Portal-Funktionen anderer Anwendungen auch Funktionen, die man sonst nirgendwo bekommt. Tiki ist höchst individuell konfigurierbar und modular aufgebaut. Alle Funktionen sind optional und können durch die browserbasierte Benutzeroberfläche verwaltet werden.

Was macht Tiki einzigartig? Seine enge Integration aller Funktionen.

## Gemeinde

Für Anfänger empfehlen wir Funktionen mit einer Bewertung als **A** oder **B**; diese sind die stabilsten. Die Funktionen und Bewertungen basieren auf der [letzten stabilen Version von Tiki](#).
