Funktionen

Tiki ist eines der funktionsreichsten CMS-Programme weltweit. Tatsächlich ist es - soweit uns bekannt - die Open Source Anwendung mit den **meisten von Haus aus eingebauten Funktionen** überhaupt. Sollte das nicht richtig sein, so sind Sie eingeladen, diese Seite zu ändern (:biggrin).

Im Gegensatz zu anderen Open Source Projekten, die nur wenige Funktionen mitbringen, und dadurch die Benutzer dazu animieren Funktionen von Drittanbieters zu installieren, bringt Tiki eine grosse Anzahl von Funktionen von Haus aus mit. Damit wird sichergestellt, dass bei Updates alle Funktionen auch weiterhin nutzbar bleiben. Ausserdem erlaubt dies, Funktionen stark zu integrieren und Inhalte in verschiedenen Funktionen ohne Einschränkungen zu nutzen. Z.B.: kann man den [Wiki Syntax](#) in allen Funktionen von Tiki benutzen, d.h. in Wiki Seiten, Foreneinträgen, Trackern, u.a. Erfahren Sie mehr über das Tiki [Model](#).

Tiki befindet sich in einem Zustand, in dem es durch die Tiki Gemeinde andauernd weiter entwickelt wird, so dass manche Funktionen noch nicht vollständig fertig entwickelt sind. Diese Seite bietet ein Bewertungssystem für jede einzelne Funktion an, um sich ein Bild davon zu machen, ob Tiki für Sie die richtige Wahl ist.

Die Bewertungen sind für die [letzte stabile Version](#). Die nächste grössere Version wird weitere Verbesserungen der u.a. Funktionen und auch neue Funktionen bringen.

Bewertungssystem

A: Ausgezeichnet - **B:** Sehr gut - **C:** gut - **D:** schlecht - **E:** sehr schlecht

Subjektive Eigenbewertung durch die Tiki Gemeinde

- Setup/admin UI: Wie einfach / intuitiv ist es, diese Funktion zu konfigurieren?
- UI end user : Wenn die Funktionen konfiguriert ist, wie einfach / intuitiv ist die Benutzung für den Enduser? (war es die Arbeit wert?)
- Stability: Wie viele Bugs gibt es noch?
- Feature-set / power: Wie gut ist diese Funktion im Vergleich zu anderen Open Source Anwendungen? *Nach dieser Spalte erfolgt standarmäßig die Sortierung*

Inhaltsbezogene Funktionen

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|-------------------------------|---|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Shopping Cart | A simple shopping cart feature - Information on products or services can be maintained in wiki pages or trackers with display via Pretty Tracker) and purchases added to Module Cart through the PluginAddToCart and sent to the payment page. | | B | B | B | D |
| Tasks | A site user's to-do list. Tasks can be sent to other users. Also, there can be shared group tasks. | | B | B | B | B |

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|-----------------------------|--|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Articles | Articles can be used for date-specific news and announcements. You can configure articles to automatically publish and expire at specific times or to require that submissions be approved before becoming "live." In addition to categories and tags , articles include their own unique classification system of Topics and Types. | | B | B | B | B |
| Contact us | Basic form for site visitors to send a message to the site admin. | | E | A | A | D |
| Wiki | Collaboratively authored documents with history of changes. Tiki's wiki has all the features you could want from a first-rate wiki. Ex.: attach files, comments, history, images, warn on edit, page locking, powerful wiki syntax, alternative WYSIWYG editor, etc. | | A | A | A | A |
| Newsletters | Create and send email newsletters (plain text and HTML) to subscribed site users and other individuals. | | A | A | B | C |
| FAQ | Create pages of frequently asked questions and answers. | | B | B | B | B |
| Surveys | Create questionnaires with multiple-choice or open-ended questions. | | A | A | B | B |
| Quizzes | Create timed quizzes with recorded scores. | | D | C | C | B |

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|-------------------------------------|--|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Inter-User Messages | Enable users to send internal messages to each other (like email but internal to the Tiki site). A message can be broadcast to multiple users in a Tiki group or to all site users if the appropriate permissions are granted. | | B | B | A | C |
| Calendar | Events calendar with public, private and group channels | | B | B | B | A |
| Trackers | Facts and figures storage and retrieval. A forms and database generator, with reporting. Can be used for a bug tracker, item database, issue tracker, etc | | B | A | B | A |
| File Gallery | File Galleries enable secure and efficient uploading, storage, downloading and other serving of all types of files including images, videos, podcasts, text and PDF documents and more. | | B | C | B | A |
| Forums | Forums are online discussions organized by topic (or thread). Tiki forums feature threaded or flat views, file attachments, moderation and queuing, monitoring (subscription) of particular forums or topics, and full usage of wiki syntax. | | B | C | B | C |
| Messages | Internal (within the site) messages from one site user to another. | | A | A | A | B |
| Maps | Maps can be created and displayed using OpenLayers and OpenStreetMap. | | B | B | B | A |
| Blogs | Multiple blogs can be created with various author and display configurations, etc. | | A | A | A | B |

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|--------------------------------|--|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Live Support | One-on-one chat with customer or other individual | | C | B | C | C |
| BigBlueButton | Open source instruction-focused real-time collaboration tool. (Audio/Video/Screensharing/Chat) | | C | A | B | B |
| My Account | Provide content organization and communication tools for registered users Bookmark , User Preferences , Watch , User Menu , Task , Inter-User Messages , User Files , Notepad and Mini Calendar | | A | A | C | B |
| Webmail | Provides a webmail interface for site users' own IMAP or SMTP accounts. The Webmail tool has been massively improved since in Tiki20 . Please see Email as a first-class citizen | | C | B | C | B |
| Shoutbox | Quick comment (graffiti) box. Like a group chat, but not in real time. | | A | A | A | D |
| MiniChat | Real-time group text chatting | | A | C | B | C |
| Featured Links | Simple menu system which can optionally add an external web page in an iframe | | B | A | A | B |
| Spreadsheet | Spreadsheets supporting calculations and charts, import/export, etc. | | A | A | C | C |
| HTML Pages | Static and dynamic HTML content. Note: HTML can be used in wiki pages. This is a separate feature. | | B | A | | C |
| File Gallery | Storage and sharing via download or display in pages, of images, videos, and other file types . Supports check-in and check-out (lock), versions, etc. | | A | B | A | A |

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|--|---|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Screencasts (Feature removed in Tiki 17) | This permits capturing the device screen and uploading to Tiki. An image is produced (that you can then draw on), or short video with sound. The jCapture applet is used. | | A | A | C | B |
| User Pages | This provides each user with a personal wiki page that only he/she can edit. All User Pages have a similar, configurable name that includes the user name. | | A | B | A | C |
| Slideshows | Turn a wiki page into slideshow (each slide is the wiki content only, without "chrome") by using more than one title bar in the page, or make a multi-page slideshow from a structure . | | C | B | B | B |
| Directory (links) | User-submitted Web links | | A | A | A | C |
| Friendship Network | Users can designate other users as "friends" using either the "follow" or "like" method. | | C | B | B | D |
| Notepad | Users can write, upload, download and read notes. Notes can be read as raw text files or as wiki pages interpreting the wiki markup syntax. The user-quota that admin can control is used to set the maximum size that user notes can take. | | B | B | B | C |
| User Files | Users upload files and store them in their Tiki personal space; they can then download the files. | | C | C | B | C |
| Kaltura Video | Video management | | C | B | B | A |

Steuerungsbezogene Funktionen

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|-----------------------|--|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| User Menu | Add personal items to the User Menu section in the application menu. | | | | | unrated |
| Meta Elements | Administer your meta tags via the admin panel (no FTP transfers necessary). | | B | | A | C |
| Modules | Boxes for content, typically on the left or right of a portal-style site but can be placed anywhere, even in page content, with or without a visual frame. Very useful for navigation and content re-use. Over 100 built-in modules are available, and site admins can create their own. | | A | A | B | A |
| Categories | Global category system. Items of different types (wiki pages, articles, tracker items, etc) can be added to one or many categories. Categories can have permissions. | | B | B | B | A |
| Semantic Links | Going beyond Backlinks , allows to define some semantic relationships between wiki pages | | C | C | B | B |
| Structure | In Tiki terminology, a structure is a hierarchy for wiki pages. Structures have navigational features such as breadcrumb links and menus; also enabled is printing all pages in the structure and in order. | | B | B | A | A |

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|--|--|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Menus | Menu items are filtered by permission, by group or activation of relevant feature. Both Bootstrap and Superfish CSS/jQuery menus are supported. | | C | A | B | A |
| Look and Feel | The site can be customized or personalized using the admin interface, to set the site title, logo and so on. No need for editing PHP or Smarty TPL files. | | B | A | B | A |
| Custom Home (Removed in Tiki 15) | This feature was made redundant by the ability, via PluginLayout, etc., to fully customize a standard wiki page to use as the Homepage. | | B | | A | C |
| Search Engine Optimization | Tiki is search engine friendly. For a Tiki site running on Apache web server, the .htaccess file enables short, meaningful URLs. | | | | | C |
| Bookmarks | User bookmarks let users bookmark internal or external pages, create folders and organize their personal bookmarks in folders. Bookmarks can be cached if that option is enabled. A module is provided to let the users see their bookmarks, navigate through them, and add new bookmarks. | | C | C | C | C |

Transversale Funktionen

Dieses sind Funktionen, die auf verschiedene Inhaltsbereiche angewendet werden.

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|--|--|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Workflow | Workflow is provided by means of category transitions and other configuration settings. | | C | | B | A |
| i18n | i18n (or internationalization) - Tiki is translated in 20 languages. Handles multilingual navigation & content. Can keep track of translation (de)synchronization. http://wiki-translation.com | | C | B | B | A |
| Compression | Transparently compress your pages on-the-fly. | | A | A | B | A |
| Themes | Thirty-three visual themes are included and several have theme options (color variants). And, with Bootstrap compatibility, it is straightforward to create your own. Tiki themes are visual layers only and so avoid the possibility of introducing a security vulnerability. | | A | A | A | A |
| News Feeds | Outgoing RSS feeds can be generated, and external RSS feeds can be subscribed to. | | B | B | B | A |
| Search | Configurable site search engine that indexes content of many features | | B | B | B | A |
| Interaction with popular external software, services or websites | For example: Google video , Google Maps , YouTube , Skype , Google AdSense , Mindmap and many more! | | | | | A |

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|---------------------------------|---|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Workspaces | Workspaces permit you to segment a Tiki instance into smaller restricted-access sections with unique preferences, themes, etc. | | D | B | B | A |
| Comments | Comment posting available for many features (wiki pages, articles, blogs, forums, etc) | | B | B | B | B |
| Mobile | Tiki uses the Bootstrap CSS framework by default for responsive web design - pages conform to the display size of all desktop and mobile devices. | | B | B | B | B |
| Watch | Site users can mark a page or other object to be notified by email when it is updated. | | B | B | C | B |
| Mail-In | Submit wiki pages or articles via e-mail. | | C | C | C | B |
| Tags | Wiki pages, articles, and so on can be given tags (aka freetags or folksonomy tags) for quick ad hoc content categorization. | | A | B | C | B |
| Social Networks | Integrates popular social networks (such as Facebook , Twitter , Linkedin or Google+) into Tiki. | | B | B | B | B |
| Print | Includes printing pages, groups of pages, and PDF documents. | | B | B | B | B |
| Statistics | Site-wide statistics for many features. Referrer stats and search stats also available. | | B | B | C | C |
| Banners | Insert, track, and manage advertising banners. | | B | A | B | C |

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|-----------------------|--|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Rating | Lets users vote on wiki pages & tracker items | | D | B | D | C |
| Contribution | Allow selecting, reporting and exporting the type of contributions made by site users. | | A | A | B | C |
| Score | If appropriate for the site, this feature implements a game approach to motivate people to participate in the online community. Users are given points for things they do in the site, like writing or reading an article, starting a new topic in a forum, voting in a poll, etc. They also earn points by having his/her blogs and articles read and commented on. Then the users will be able to see their position in a ranking. | | | | | C |
| Accessibility | Not so much a feature as a value, web accessibility is prioritized in Tiki. | | | | | C |
| Tell a Friend | With this feature activated, to share pages, a link "Email this page" is added at the top of all pages. | | B | B | B | C |
| Community | Configure site community settings such as user identity and participation details, and social interaction settings. | | B | B | B | C |

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|-----------------------------|--|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Color Modes | Color modes enable website users to select an alternative color scheme. Initially in Tiki 26, users can switch between light, dark, and auto (auto mode means following the preference set in the user's browser). In Tiki 26.1, the ability to add custom color modes via Look and Feel admin controls will be added. | | C | B | C | C |

Textbereichsbezogenen Funktionen

Dieses sind Funktionen, die in allen Textbereichen benutzt werden können, z.B. in Wiki Seiten, Blogs, Artikeln und Foren.

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|------------------------------|---|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Wiki Plugins | Over 100 built-in plugins extend the function of wiki syntax with more specialized commands. It is very easy to create your own plugins with plugin alias or from scratch. | | B | B | B | A |
| Wiki Syntax | Apply formatting and styling to text directly or via editor toolbar buttons; no need for HTML. Strong help feature and usable throughout various features such as blogs and articles, not just in the wiki! | | B | B | B | A |

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|---|---|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Automatic Table of Contents | Automatically generate and display a table of contents based on page titles within a structure (toc), or from the headings on a page (maketoc). | | A | C | A | C |
| Content Template | Create and select reusable text or layout code when editing a wiki page, article, or newsletter to have a consistent look and feel and/or content. | | B | B | B | C |
| External Wikis | Create links easily with other wikis. | | B | B | A | C |
| Cache | External URLs can be cached inside Tiki - this is possible for links from the Wiki as well as for the User Bookmarks | | B | B | A | C |
| Hotwords | If enabled, wiki pages are parsed and some words are automatically converted to HTML links. | | | | | C |
| PluginModule | Insert a content or functionality module in any editable-text area of the site, such as a wiki page, article, etc. | | B | C | B | B |
| Polls | Make and manage lists of options to be voted on; polls are displayed in a module (in left or right column or other module zone, in wiki pages, etc.). | | B | A | C | C |

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|----------------------------------|--|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Dynamic Variable | Snippets of text which can be reused throughout Tiki. | | C | | | C |
| Random Taglines | Taglines (aka "cookies" or "fortune cookies") drawn randomly and displayed. | | B | B | A | C |
| Copyright | The Copyright Management System (or ©MS) is a way of licensing your content and displaying that license information, such as under an open or free content license. By switching this feature on, you can define a content license for all your wiki content, associate copyright notices with individual pages and display a full license for printing. | | D | | | C |
| Toolbars | The edit page toolbar enables styling text, adding an image, Makes using wiki syntax easy. Custom buttons can be added, and toolbars can be customized for the various sections of the site. | | C | C | B | A |

Verwaltungsfunktionen

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|-----------------------|-------------|--------------------------------------|--------------------|-------------|-----------|-----------------------|
|-----------------------|-------------|--------------------------------------|--------------------|-------------|-----------|-----------------------|

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|---|---|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Permissions | Different rights can be assigned to groups. (ACLs) | | C | | A | A |
| Theme Control | Visual themes can be flexibly assigned per user group, site section, content category, and so on. | | A | A | A | A |
| Cache | Tiki uses the built-in cache of the Smarty template engine . | | A | A | B | A |
| External Authentication | Can use LDAP (Active Directory), PAM, Auth , Http web server , CAS or Shibboleth . | | B | A | B | A |
| Installation | Tiki site installation is a simple process of going through the steps of a wizard, and post-install configuration also offers wizard options. | | A | | A | A |
| User Administration | Great flexibility in handling user registration, logging in, and banning of users, should that be necessary. | | A | A | A | A |
| Groups | The three default groups (anonymous, registered, and admin) can be added to freely as needed for the site. Groups can inherit other groups' permissions, to simplify access management. | | A | A | A | A |

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|--------------------------------------|---|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Manager | A combination of shell and PHP scripts to install, update, backup and monitor (check security of) a large number of Tiki installations (instances). | | D | | C | A |
| Profiles | In Tiki terminology, a "profile" is a set of site configuration preferences and website item creation instructions that are applied as a group. | | A | A | B | A |
| Communication Center | Send/receive objects to and from other Tiki-powered sites | | B | A | A | B |
| Intertiki | Authenticate users and grant them appropriate permissions at a "slave" Tiki site based on user data from an external "master" Tiki site. (This is used at the Tiki project sites, for example.) | | D | C | D | B |
| Banning | Block access from individual IPs or ranges of IPs. | | A | A | A | B |
| Edit Template | Edit the Smarty template files that Tiki is built with via the admin control panel. | | B | | C | B |
| Connect | Various tools for communication with the Tiki Community, developers, other Tiki site admins and users. | | B | B | B | B |

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|----------------------------|---|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Edit CSS | Existing stylesheets can be edited (via the browser), with the new stylesheet suffixed with the editor's user name. | | B | B | E | C |
| Action Log | Track user activity on the basis of a single user or multiple users, groups or categories. | | B | B | B | C |
| Payments | Enables the requesting and management of payments (invoicing), and connects payments to other features. | | C | B | B | C |
| Packages | External software packages installation and management via Composer . | | B | B | C | C |

Erweiterte Funktionen für Programmierer

| Feature name and link | Description | Dev (Bug reports & Feature requests) | Setup and admin UI | UI end user | Stability | Feature-set and power |
|----------------------------------|--|--------------------------------------|--------------------|-------------|-----------|-----------------------|
| Integrator | Automatically import external HTML pages into Tiki. | | D | B | B | B |
| Debugger Console | Debugger Console | | | | | B |
| Web Services | Can receive web services via JSON or YAML. | | D | | C | B |

Andere Funktionen

| Feature name and link | Description | Dev (Bug reports & Feature requests) |
|------------------------------|--|--------------------------------------|
| We eat our own DogFood | Tiki is a community. Tiki is a software. The Tiki community is recursively using and improving the Tiki software, which is used to support the community as well as to make available to the general public. | |
| Open Development | Written and maintained by an active and international community of volunteer contributors. While many developers offer consulting services, no company controls the development. Think of Tiki as applying the wiki way not just to content but also to software development. YOU are invited to participate!" Please read more about the Tiki Model | |
| Open standards and protocols | Tiki developers are Tiki users too and prefer open protocols and standards - http://tiki.org/TikiStandards . | |
| Platform independence | Tiki runs wherever PHP runs, on Linux, Mac, Windows and many more other operating systems. | |
| Browser Compatibility | On the client side, all you need is a Web browser running on a desktop computer, laptop, tablet, or smartphone. | |
| Documentation | Tiki's documentation is a wiki (of course!). So you can participate! There are links from your installed Tiki application directly to the corresponding documentation wiki page. As the documentation is constantly being updated and organized, broken links may sometimes occur. Please bear with us and feel free to participate! | |
| External Libraries | Tiki makes good use of existing and active open source projects such as Zend Framework, Smarty, MySQL, PHP, jQuery, Bootstrap, CKeditor, etc. | |

Allgemeine Hinweise

Über die jeweiligen Tiki Funktionen

Weil Tiki bereits von Hause aus eine so grosse Anzahl von Funktionen bietet, kann dies selbst für einen erfahrenen Benutzer oder gar Administrator überwältigend sein. Tiki hat neben den klassischen CMS- und Portal-Funktionen anderer Anwendungen auch Funktionen, die man sonst nirgendwo bekommt. Tiki ist höchst individuell konfigurierbar und modular aufgebaut. Alle Funktionen sind optional und können durch die browserbasierte Benutzeroberfläche verwaltet werden.

Was macht Tiki einzigartig? Seine enge Integration aller Funktionen.

Gemeinde

Das ganze Tiki Wiki CMS Groupware Projekt ist sehr aktiv. Im Durchschnitt werden Codeveränderungen (so wie Bugfixes oder neue Funktionen) [alle 2 Stunden hochgeladen](#). Über [200 Menschen haben am Quellcode mitgewirkt](#). Durch die grosse Zahl an Unterstützern werden die Funktionen ständig weiter entwickelt und verbessert. Weil Tiki ein Open Source Projekt ist, [können auch Sie daran teilnehmen](#) und helfen es zu verbessern!

Benutzung dieser Evaluation

Diese Selbstevaluation der Funktionen wird Ihnen helfen herauszufinden, was Sie nach der Installation von Tiki erwartet. Viele Funktionen sind in weitverbreiteter Benutzung und recht stabil. Andere sind hingegen neu und experimentell. Wieder andere werden nicht länger betreut und haben nur einen eingeschränkten Funktionsumfang. Für Anfänger empfehlen wir Funktionen mit einer Bewertung als **A** oder **B**; diese sind die stabilsten. Die Funktionen und Bewertungen basieren auf der [letzten stabilen Version von Tiki](#).

Aktualisierung der Evaluation

Um die Selbstevaluation zu verbessern und zu aktualisieren, [loggen Sie sich bitte ein](#) und klicken dann auf den Namen der Funktionen. Sie können dann fehlende Informationen ergänzen oder korrigieren. Z.B. können Sie, wenn Sie meinen eine Funktion verdiene ein **B** anstelle eines **D**, ändern Sie es. Oder fügen Sie Kommentare zu bestimmten Funktionen hinzu.

Hinweis: Alle Änderungen werden durch einen [Projekt Administrator](#) geprüft und können geändert werden, wenn notwendig.

Um auf einen Fehler hinzuweisen oder eine neue Funktion vorzuschlagen benutzen Sie bitte [den Fehler- und Wunschlisten-Tracker](#).

Fehlende Funktionen

Diese Seite listet nicht alle Funktionen von Tiki auf. Z.B. fehlen viele [Plugins](#).

Wenn Sie bis hierher gelesen haben, müssen Sie denken: "Was kann das Ding *nicht*?. Besuchen Sie hierzu die Seite [Fehlende Funktionen](#) um eine Liste von Funktionen einzusehen, die noch nicht ein Teil von Tiki sind.
