

Plugins tab

Overview

Use this tab to enable a specific [Wiki Plugin](#)

To Access

From the [Editing and Plugins](#) page, click the **Plugins** tab.

Note

The plugins listed on this tab correspond to the PHP files in your `../lib/wiki_plugins/` directory. If you recently installed a new plugin, you may need to clear the Tiki cache.

Option	Description	Default
Automatically approve wiki-plugins on pages installed by profiles	Some wiki-plugins require admin approval before they are executable. If turned on, then all wiki-plugins that are on wiki pages created via profiles are automatically approved. ⚠ <i>Make sure your profiles are not executable or editable by untrusted users.</i>	Disabled
Plugin pending approval notification	Send an email alert to users with permission to approve plugins when a plugin approval is pending	Disabled
Default for img-fluid class used in the IMG plugin	Default option for whether an image produced with the IMG plugin has the img-fluid class - a plugin parameter allows this to be overridden	Enabled
Maximum plugin parsing passes	Affects the number of wiki plugins that can be used. The default of 500 allows for 1 plugin nested seven times, or 44 plugins nested once. A value of 1200 is required for 1 eighth level plugin. ⚠ <i>Setting this to a higher value than the default of 500 may have performance implications.</i> ⚠	500 passes
Allow plugin-specific edits	Add an icon next to each plugin usage to enable editing the plugin in a popup form, without needing to edit the whole page. This feature is unavailable outside wiki pages, whether or not this preference is enabled.	Enabled
Only display focused edit icons (for sections and/or plugins) on request	Focused edit icons will only display after a per-session "Edit icons" preference is enabled. This preference is defined directly from any wiki page.	Enabled

Option	Description	Default
GUI for the list plugin	Experimental GUI for the list plugin in popup plugin edit forms. (listgui) 	Disabled
Plugin trackerlist converter	Button on trackerlist and trackerfilter plugins edit form to convert them to use the list plugin instead. 	Disabled
Plugins tab of the textarea control panel loads with an empty list	Improve the performance of the textarea control panel by avoiding the loading of all plugins initially  <i>Some plugins may not appear. When using the MySQL engine, can have problems with short plugin names (for MyISAM, those under "ft_min_word_len").</i> 	Disabled
